Mixers and loaders must wear:
- coveralls over long-sleeved shirt and long pants,
- chemical-resistant gloves made of any waterproof material, shoes plus socks.
- protective eyewear and chemical-resistant apron when cleaning equipment, mixing or loading.

Applicators and other handlers (other than mixers and loaders) must wear:
- moderate eye irritation.
- repeated skin contact may cause allergic reactions in some individuals.
- Causes spray mist. Avoid contact with skin, eyes, or clothing. Prolonged or frequently

Have the product container or label with you when calling a poison control center
FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL:
1-800-301-7976.

ENVIRONMENTAL HAZARDS
The product is toxic to fish. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Apply this product only as specified on the label.

AGRICULTURAL USE REQUIREMENTS
Use this product only as specified on the label.

Conditions of Sale and Warranty are to be followed. This labeling must be in the user's possession during application.

See Below for Additional Precautionary Information.

FIRST AID

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have a person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL:
1-800-301-7976.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

EPA REG. NO. 7969-105-34704
EPA EST. NO. 7969-WG-01
NET WEIGHT: 30 LBS. (13.60 KG)

Zinc expressed as metallic—14.0%

ACTIVE INGREDIENTS:
A mixture of 5.2 parts by weight (83.9%) of ammoniates of [ethylenebis (dithiocarbamate)] zinc with 1 part by weight (16.1%) ethylenebis (dithiocarbamic acid) bimolecular and trimolecular cyclic anhydrosulfides and disulfides 80.0%
INERT INGREDIENTS: ............................................. 20.0%
TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

If in eyes:
- Remove PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

USER SAFETY RECOMMENDATIONS
Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Do not allow this material to drift onto neighboring crops or non-crop areas or use in a manner or at a time other than in accordance with label directions because animal, plant or crop injury, illegal residues or other undesirable results may occur.

ENVIRONMENTAL HAZARDS
The use of any pesticide in a manner that may kill or otherwise harm an endangered species or adversely modify their habitat is a violation of federal law.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

All applicable directions, restrictions, precautions and Conditions of Sale and Warranty are to be followed. This labeling must be in the user's possession during application.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing dust or spray mist. Avoid contact with skin, eyes, or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Causes moderate eye irritation.

Personal Protective Equipment (PPE):
Applicators and other handlers (other than mixers and loaders) must wear:
- coversalls over long-sleeved shirt and long pants, chemical-resistant gloves made of any waterproof material and shoes plus socks.

Mixers and loaders must wear:
- coversalls over long-sleeved shirt and long pants, chemical-resistant gloves made of any waterproof material, shoes plus socks, protective eyewear and chemical-resistant apron when cleaning equipment, mixing or loading.
POLYRAM® 80 DF
EPA REG. NO. 7969-105-34704

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children and animals.

PESTICIDE STORAGE: Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use, fold and roll back bags, clamp and close tightly. Do not put concentrate or dilute material into food or drink containers.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, if allowed by State and local authorities, by burning, if burned, stay out of smoke. IN CASE OF EMERGENCY: In case of large-scale spillage regarding this product, call: 1. Your local doctor for immediate treatment.
2. Your local poison control center (hospital).

I. GENERAL INFORMATION

Polyram® 80 DF fungicide is effective for controlling apple scab, apple rusts, early blight and late blight in potatoes. It is recommended that Polyram 80 DF be used in an integrated Pest Management Program.

Crop Tolerance
All listed crops are tolerant to Polyram 80 DF at all stages of growth.

Coverage
Polyram 80 DF is a contact fungicide, therefore, thorough coverage of plant parts to be protected is essential for effective disease control.

Cleaning Spray Equipment
Clean application equipment thoroughly using a strong detergent or commercial sprayer cleaner according to the manufacturer’s directions before and after applying this product.

II. APPLICATION INSTRUCTIONS

Polyram 80 DF should be used at the rates listed in section VII. Crop-Specific Information.

Ground Application (Broadcast)
Water Volume: Use a minimum of 20 gallons per acre for apples. Use a minimum of 15 gallons per acre for potatoes.

Aerial Application
Water Volume: Use a minimum of 10 gallons per acre for apples. Use a minimum of 5 gallons per acre for potatoes.

Foliar Applications:
Where EBDC products used allow the same maximum poundage of active ingredient per acre per season: If more than one product containing an EBDC active ingredient (maneb, mancozeb, or metiram) is used on a crop during the same growing season and the EBDC products used allow the same maximum poundage of active ingredient per acre per season, then the total poundage of all such EBDC products used must not exceed any of the specified individual product maximum seasonal poundage of EBDC active ingredient allowed per acre.

Where EBDC products used allow different maximum poundage of active ingredient per acre per season: If more than one product containing an EBDC active ingredient is used on a crop during the same growing season and the EBDC products used allow different maximum poundage of active ingredient per acre per season, then the total poundage of all such EBDC products used must not exceed the lowest specified individual EBDC product maximum seasonal poundage of active ingredient allowed per acre.

Seed Treatment
In addition to the maximum number of foliar applications permitted by the formula stated above, a single seed treatment application may be made on potatoes.

III. ADDITIVES

To achieve consistent control, spray oils may be needed. For additional information, see Compatibility Test for Mix Components.

Compatibility Test for Mix Components
Add components in the following sequence using 2 teaspoons for each pint or 1 teaspoon for each pint of recommended label rate per acre.

1) Water: For 20 gallons per acre spray volume, use 3.3 cups (800 ml) of water. For other spray volumes, adjust rates accordingly. Use only water from the intended source at the source temperature.

2) Products in PVA bags:
3) Water-dispersible products (such as Polyram 80 DF, wettable powders, suspension concentrates, or suspo-emulsions).
4) Water-soluble products Cap the jar and invert 10 cycles.
5) Emulsifiable concentrates Cap the jar and invert 10 cycles.
6) Water-soluble additives Cap the jar and invert 10 cycles.
7) Let the solution stand for 15 minutes.
8) Evaluate the solution for uniformity and stability. The spray solution should not have free oil on the surface, nor fine particles that precipitate to the bottom, nor thick (clabbered) texture. Do not use any spray solution that could clog spray nozzles.

IV. MIXING ORDER

1) Water: Begin by agitating a thoroughly clean sprayer tank three-quarters full of clean water.
2) Agitation: Maintain constant agitation throughout mixing and application.
3) Products in PVA bags: Place any product contained in water-soluble PVA bags into the mixing tank. Wait until all water-soluble PVA bags have fully dissolved and the product is evenly mixed in the spray tank before continuing.
4) Water-dispersible products (such as Polyram 80 DF, wettable powders, suspension concentrates, or suspo-emulsions)
5) Water-soluble products
6) Emulsifiable concentrates: If an inductor is used, rinse it thoroughly after the component has been added.
7) Water-soluble additives: If an inductor is used, rinse it thoroughly after the component has been added.
8) Remaining quantity water

Maintain constant agitation during application. For more information, refer to section V. General Tank Mixing Information.

V. GENERAL TANK MIXING INFORMATION

See section VII. Crop-Specific Information for more details. Read and follow the applicable Restrictions and Limitations and Directions For Use on all products involved in tank mixing. The most restrictive labeling applies to tank mixes.

Tank Mix Partners/Components
Refer to Section VII. Crop-Specific Information for more details regarding tank mixes with Polyram 80 DF.

The manufacturer does not recommend using tank mixes other than those listed on the manufacturer’s labeling. Physical incompatibility, reduced disease control, or crop injury may result from mixing Polyram 80 DF with other pesticides (fungicides, herbicides, insecticides, or miticides), additives, or fertilizers. Local agricultural authorities may be a source of information when using other than the manufacturer recommended tank mixes.

VI. GENERAL RESTRICTIONS AND LIMITATIONS - ALL CROPS

Maximum seasonal use rate: See Table 1. Crop Specific Restrictions and Limitations and section VII. Crop Specific Information

Preharvest Interval (PHI): See Table 1. Restricted Entry Interval (REI): 24 hours.

1 For extended applications and tank mixes.

See section VII. Crop Specific Information.
Apples
For control of apple scab and apple rusts, Polyram 80 DF should be used as a
resistance management tool. Applications are based on tree-row volume. It is rec-
commended that Polyram 80 DF be used in an Integrated Pest Management pro-
gram. Use only on a protective schedule.

Pre-bloom Application Schedule
Timing: Begin application at 0.25-0.5 inch green tip and continue at 7-10 day
intervals.
Rate: Apply up to 6 pounds per acre, per application.

Pre-bloom Restrictions and Limitations
Do not apply more than 4 applications of Polyram 80 DF per season.
Do not apply Polyram 80 DF after bloom.
Do not apply more than 24 pounds of Polyram 80 DF per acre per season.

Extended Application Schedule
Timing: Begin application at 0.25-0.5' green tip and apply at 7-10 day intervals.
Rate: Apply up to 3 pounds per acre, per application.

Extended Application Restrictions and Limitations
Do not apply more than 7 applications of Polyram 80 DF per season.
Do not apply within 77 days of harvest.
Do not apply more than 21 pounds of Polyram 80 DF per acre per season.

Crop-Specific Restrictions and Limitations
Do not combine or integrate the ‘pre-bloom’ and ‘extended application’ schedules.
Do not graze livestock in treated areas.

Apple Tank Mixes
Polyram 80 DF is compatible with most of the apple pesticides with which it
might be normally used, including spray oils, Kelthane, and diazinon. Observe all cautions
and limitations on labeling of all products used in mixes.

Potatoes
Apply Polyram 80 DF to potatoes for control of early blight and late blight. Rates are
based on 100 gallons per acre. It is recommended that Polyram 80 DF be used in an
Integrated Pest Management program. Vinecolor should occur 14 days before harvest.
Rate: Apply 1.5-2.0 pounds per acre.
Timing: Begin application when plants are 4-6” high or earlier if disease conditions
warrant, at 5-10 day intervals when disease pressure is low, and at 5-7 day inter-
vals when disease pressure is high.

Chemigation
Apply by chemigation only to potatoes using only sprinkler irrigation systems. Do
not apply chemigation to any other crop or to this crop using any other type of irri-
gation equipment. Apply this product only through one of the following types of sys-
tems: sprinkler including center pivot, lateral move, end tow, side (wheel) roll, trav-
er, big gun, solid set, or hand move irrigation systems. Do not apply this product through any other type of irrigation system.
Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result
from non-uniform distribution of treated water. If you have questions about calibra-
tion, you should contact State Extension Service specialists, equipment manufac-
turers or other experts. Do not connect an irrigation system (including greenhouse systems) used for pes-
ticide application to a public water system unless the pesticide label-prescribed safety devices for public water systems are in place.
A person knowledgeable of the chemigation system and responsible for its opera-
tion, or under the supervision of the responsible person, shall shut the system down and
make necessary adjustments should the need arise.
The system must contain a functional check valve, vacuum relief valve, and low
pressure drain appropriately located on the irrigation pipeline to prevent water-
source contamination from backflow. The pesticide injection pipeline must contain a
functional, automatic, quick-closing check valve to prevent the flow of fluid back
through the injection pump. The pesticide injection pipeline must also contain a func-
tional, normally closed, solenoid-operated valve on the intake side of the injection
pump and connected to the system interlock to prevent fluid from being withdrawn
from the supply tank when the irrigation system is either automatically or manually
shut down.
The system must contain a functional interlocking control to automatically shut off
the pesticide injection pump when the water pump motor stops. The irrigation line
or water pump motor must include a functional pressure switch to stop the water
pump motor when the water pressure decreases to the point where a pesticide
distribution is adversely affected. Systems must use a metering pump, such as a positive displacement injection pump
(e.g., diaphragm pump) effectively designed and constructed of materials that are
compatible with pesticides and capable of being fitted with a system interlock.
Do not apply when wind speed favors drift beyond the area intended for treatment.
Agitation must be maintained in the supply tank.

Crop Specific Restrictions and Limitations:
Do not apply this tank mix within 14 days of harvest in all states except Connecticut,
Delaware, Florida, Massachusetts, Maine, Michigan, New Hampshire, New York,
Ohio, Pennsylvania, Rhode Island, Vermont, and Wisconsin. In these states, do
not apply within 3 days of harvest.

Potato Tank Mixes
Polyram 80 DF is compatible with most of the potato pesticides with which it
might normally be used.
Observe all cautions and limitations on labeling of all products used in mixes.

APPLES
For control of apple scab and apple rusts, Polyram 80 DF should be used as a
resistance management tool. Applications are based on tree-row volume. It is rec-
commended that Polyram 80 DF be used in an Integrated Pest Management pro-
gram. Use only on a protective schedule.

Pre-bloom Application Schedule
Timing: Begin application at 0.25-0.5 inch green tip and continue at 7-10 day
intervals.
Rate: Apply up to 6 pounds per acre, per application.

Pre-bloom Restrictions and Limitations
Do not apply more than 4 applications of Polyram 80 DF per season.
Do not apply Polyram 80 DF after bloom.
Do not apply more than 24 pounds of Polyram 80 DF per acre per season.

Extended Application Schedule
Timing: Begin application at 0.25-0.5’ green tip and apply at 7-10 day intervals.
Rate: Apply up to 3 pounds per acre, per application.

Extended Application Restrictions and Limitations
Do not apply more than 7 applications of Polyram 80 DF per season.
Do not apply within 77 days of harvest.
Do not apply more than 21 pounds of Polyram 80 DF per acre per season.

Crop-Specific Restrictions and Limitations
Do not combine or integrate the ‘pre-bloom’ and ‘extended application’ schedules.
Do not graze livestock in treated areas.

Apple Tank Mixes
Polyram 80 DF is compatible with most of the apple pesticides with which it
might be normally used, including spray oils, Kelthane, and diazinon. Observe all cautions
and limitations on labeling of all products used in mixes.

VII. CROP-SPECIFIC INFORMATION

Apples
For control of apple scab and apple rusts, Polyram 80 DF should be used as a
resistance management tool. Applications are based on tree-row volume. It is rec-
commended that Polyram 80 DF be used in an Integrated Pest Management pro-
gram. Use only on a protective schedule.

Pre-bloom Application Schedule
Timing: Begin application at 0.25-0.5 inch green tip and continue at 7-10 day
intervals.
Rate: Apply up to 6 pounds per acre, per application.

Pre-bloom Restrictions and Limitations
Do not apply more than 4 applications of Polyram 80 DF per season.
Do not apply Polyram 80 DF after bloom.
Do not apply more than 24 pounds of Polyram 80 DF per acre per season.

Extended Application Schedule
Timing: Begin application at 0.25-0.5’ green tip and apply at 7-10 day intervals.
Rate: Apply up to 3 pounds per acre, per application.

Extended Application Restrictions and Limitations
Do not apply more than 7 applications of Polyram 80 DF per season.
Do not apply within 77 days of harvest.
Do not apply more than 21 pounds of Polyram 80 DF per acre per season.

Crop-Specific Restrictions and Limitations
Do not combine or integrate the ‘pre-bloom’ and ‘extended application’ schedules.
Do not graze livestock in treated areas.
