- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.
- This labeling must be in the possession of the user at the time of pesticide application.
- This recommendation is made as permitted under FIFRA §2(ee) and has not been submitted to or approved by the EPA.

PRODUCT MODE OF ACTION

AZA-DIRECT controls target pests on contact or by ingestion. The product acts on pests by way of repellence, antifeedance and interference with the molting process. The buyer or user is reminded that the degree of efficacy of the product is largely dependent on weather conditions, intensity of pest population, area of application, type of pest, and physical stages of pests and crops.

GENERAL INFORMATION

Read all directions before using this product.

AZA-DIRECT can be applied as directed to any food or non-food crop up to and including the day of harvest, at a maximum rate of 3½ pints/Acre. Refer to the Use Site Section for a complete listing of crops.

RATES

AZA-DIRECT can be used at 642 ounces/acre on lettuce for the suppression of diseases. For best results, use **AZA-DIRECT** in a disease control program or in combination with other disease control products.

USE SITES

AGRICULTURAL USE SITES - **AZA-DIRECT** may be used on agricultural use sites including, but not limited to, the following:

Lettuce (head and leaf)
