**Ronstar® 50 WSP Herbicide**

**Preemergence Herbicide for the Control of Annual Grasses and Broadleaf Weeds in Turf and Ornamentals Including Landscape Ornamental Beds on Residential Properties.**

For sale to and use by Professional Applicators only. Not for sale to or use by homeowners/consumers. Not for use on turf or ornamentals. People of the State or Tribe, consult the agency responsible for pesticide regulation.

**PACKETS PER ACRE**

- **Weeds Controlled**
  - Crabgrass (Digitaria spp.)
  - Goosegrass (Eleusine indica)
  - Annual Bluegrass (Poa annua)

- **Number of Ronstar 50 WSP Packets Per Acre**
  - 4-6

- **When To Apply**
  - In 30 - 150 gallons of water: Use the higher rate with expected heavy water pressure
  - Apply in late winter or early spring prior to weed seed germination and turf thinning

**Turf**

For use in dormant, established Bermudagrass, St. Augustinegrass and Zoysia turf such as fairways, parks, golf courses and lawns. Ronstar® 50 WSP Herbicide controls Crabgrass, Goosegrass, Annual Bluegrass, Annual Sedge and Virginia Buttonweed. Ronstar® 50 WSP Herbicide should be applied at least 3 weeks prior to green up. Fake turf area free of leaves, mowing if necessary as the spray solution reaches the soil surface. Measure the area to be treated and apply the amount required. If rain is not expected within 4 hours after application, irrigate the turf throughout.

- **Do not use on ST. AUGUSTINE GRASS or ZOYSIA TURF in CALIFORNIA.**
- **Hawaii use only:** Ronstar® 50 WSP Herbicide may be applied too newly sprigged Zoysia grass being grown for sod. Insure the spray reaches the soil surface and if rain is not expected shortly after application, irrigate the turf thoroughly.

**PREEMINERGENCE WEED CONTROL**

**Weeds Controlled**

- Crabgrass, Goosegrass, and Annual Sedge

**NUMBER OF Ronstar® 50 WSP Packets Per Acre**

- 4-6

**When To Apply**

- Apply in late winter or early spring prior to weed seed germination and turf thinning. For best results, irrigate immediately after application. The minimum single application rate is 4 lbs ai/A. A subsequent application can be made 4 months after the previous treatment. Treatment is effective only against spring germinating Poa annua. Ronstar® 50 WSP Herbicide does not control Poa annua that has germinated prior to the application.

**AGRICULTURAL USE REQUIREMENTS**

- Use this product only in accordance with the labeling and with the Worker Protection Standard. Do not apply more than 12 lbs of product/A/yr (6 lbs ai/A/yr), except in areas of heavy weed infestation. In areas of heavy infestation, do not allow the empy bag or the tear-strip to fall into the spray tank as they are not water-soluble and may clog the sprayer.
- Do not break the seal until the time of use.
- Do not apply if rain is expected within 4 hours after application.
- Do not use a knife or other sharp object to break the seal. Once the plastic lined paper bag is open, the water-soluble packets inside can be dropped into the spray tank at the appropriate time without touching them.
- If rain is expected within 4 hours after application, do not apply more than 12 lbs of product/A (6 lbs ai/A).
- When mixing and applying, do not allow the product to come in contact with any of the following materials: paints, varnishes, rubber, or bituminous materials.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.

**Non-agricultural Use Requirements**

- Water-soluble packets equal 1 pound of product, which is equivalent to 0.5 pounds of active ingredient.
- RONSTAR® 50 WSP Herbicide is a preemergent herbicide for control of annual grasses and broadleaf weeds in turf and a variety of woody ornamental shrubs and trees. RONSTAR® 50 WSP Herbicide controls weeds by killing the weed seedlings as they come in contact with the herbicide during germination.
- Apply RONSTAR® 50 WSP Herbicide with a properly calibrated sprayer that will apply the spray solution uniformly in application. Essential for satisfactory weed control. Calibrate the sprayer prior to use, according to the manufacturer’s instructions and check daily to be certain that the equipment is working properly.

**GENERAL INFORMATION**

- Water-soluble package equals 1 pound of product, which is equivalent to 0.5 pounds of active ingredient.
- RONSTAR® 50 WSP Herbicide is a preemergent herbicide for control of annual grasses and broadleaf weeds in turf and a variety of woody ornamental shrubs and trees. RONSTAR® 50 WSP Herbicide controls weeds by killing the weed seedlings as they come in contact with the herbicide during germination.
- Apply RONSTAR® 50 WSP Herbicide with a properly calibrated sprayer that will apply the spray solution uniformly in application. Essential for satisfactory weed control. Calibrate the sprayer prior to use, according to the manufacturer’s instructions and check daily to be certain that the equipment is working properly.

**GENERAL HANDLING INSTRUCTIONS:**

- Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.
- Do not discharge effluent containing this product to sewers or septic tanks.
- Do not discharge effluent containing this product to wells, springs, streams, or springs unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.
- Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.

**EUROPEAN AND INTERNATIONAL REQUIREMENTS**

- Do not apply RONSTAR® 50 WSP Herbicide to meadows and areas of heavy infestation. In areas of heavy infestation, do not allow the empy bag or the tear-strip to fall into the spray tank as they are not water-soluble and may clog the sprayer.
- Do not break the seal until the time of use.
- Do not apply more than 12 lbs of product/A (6 lbs ai/A).
- When mixing and applying, do not allow the product to come in contact with any of the following materials: paints, varnishes, rubber, or bituminous materials.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.

**Labeling Requirements**

- Do not use on ST. AUGUSTINE GRASS or ZOYSIA TURF in CALIFORNIA.
- Hawaii use only: Ronstar® 50 WSP Herbicide may be applied too newly sprigged Zoysia grass being grown for sod. Insure the spray reaches the soil surface and if rain is not expected shortly after application, irrigate the turf thoroughly.
- Do not use RONSTAR® 50 WSP Herbicide as pulling grass or trees because of the varying cultural practices used. Apply in 30 - 150 gallons of water per acre.
- The minimum application rate allowed per year is 12 lbs product/A (equivalent to 6 lbs ai/A/year), except in areas where there is heavy weed infestation.
- In areas of heavy weed infestation, the maximum application rate is 16 lbs product/A (equivalent to 8 lbs ai/A/year).
- For best results, water-in-product as soon as practical after application.
- *Do not use in California for annual weed control during Bermudagrass establishment from sprigs.*

---

**User Safety Recommendations**

- **When to Use This Product:** Do not apply when exposed to extreme temperatures or direct sunlight. Do not apply if rain is expected within 4 hours after application. Do not apply more than 12 lbs of product/A (6 lbs ai/A)

- **Storage and Disposal:** Do not pour into or contaminate bodies of water. Rinse containers and equipment promptly with water.

- **Transportation:** Do not transport in or around the home. Store containers in child-resistant closures.

- **Inert Ingredients:** Oxadiazon 3-[2,4-dichloro-5-(1-methylethoxy)phenyl]-5-(1,1-dimethylethyl)-1,3,4-oxadiazol-2 (3H)-one ............................50%

---

**EPA Reg. No. 432-893**

---

**KEEP OUT OF REACH OF CHILDREN**

**WARNING • AVISO**

Do not apply this product to turf or ornamentals in or near water or sources of water. They may not be used in areas where irrigation or rainfall can cause runoff to bodies of water.

**Non-contingency**

- Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.
- Do not contaminate water, food or feed by storage or disposal.
- Do not store in or around the home.
WOODY ORNAMENTAL SHRUBS AND TREES, CONIFER NURSERIES, AND ORNAMENTAL PROPERTIES

GENERAL USE INSTRUCTIONS: Must be applied to the above-recommended species. Apply RONSTAR 50 WSP Herbicide prior to weed seed germina-
tion as a directed spray to the soil surface or as on-the-top application on tolerant ornamentals used as ground cover listed on this label. RON-
STAR 50 WSP Herbicide can be applied to both newly transplanted and established plants. Application can be made to Chip, growing or dormant
plants. However, apply RONSTAR 50 WSP Herbicide prior to bud break or no later than 4 weeks after bud break. Rainfall or irrigation (one-half inch) imme-
diately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile.
Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.

AMOUNT TO USE: Apply RONSTAR 50 WSP Herbicide broadcast, in a minimum of 50 gallons of water per acre (14 gallons of water per 1,000 sq
ft), to seasonal weed problems before application. Apply a minimum of 8 WSP packets or 4 lbs ai as a single application. The maximum number of
applications that may be made per year is two. The maximum single application rate is 4 lbs ai. A subsequent application can be made 4 months
after previous treatment. For over the top sprays, irrigate within 2 hours after application, otherwise injury to the ornamentals may result.

ORNAMENTAL PROPERTIES: In RONSTAR 50 WSP Herbicide may be applied to landscape beds consisting of well-defined areas of
small or mixed stands of trees, shrubs, and ground covers located around buildings as well as in open areas of the residential property. When using
Low Pressure Handwand Applicators, Professional Applicators are to use only the 1.5 oz. RONSTAR 50 WSP Herbicide packets. Carefully measure
the area of each bed to be treated to insure an accurate application rate.

Restrictions:

• Do not apply in greenhouses as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in condensate.
• Do not mechanically mix RONSTAR 50 WSP Herbicide into the soil.
• Do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 WSP Herbicide is watered in and the
soil surface is dry.
• Do not apply with adjuvants or drift control agents.
• Do not apply more than 12 lbs of product/yr (6 lbs ai/yr), except in areas of heavy weed infestation.

AMOUNT TO USE: Apply 8 water-soluble packets per acre.

RAINFALL OR IRRIGATION: Immediately after application of RONSTAR 50 WSP Herbicide w ill improve weed control and move RONSTAR 50
WSP Herbicide into the upper soil profile. Sprinkle irrigate the foliage within 2 hours after application, otherwise injury to the ornamentals may result.

PRECAUTIONS AND RESTRICTIONS:

• Do not apply in greenhouses as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in condensate.
• Do not mechanically mix RONSTAR 50 WSP Herbicide into the soil.
• Do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 WSP Herbicide is watered in and the
soil surface is dry.
• Do not apply with adjuvants or drift control agents.
• Do not apply more than 12 lbs of product/yr (6 lbs ai/yr), except in areas of heavy weed infestation.

APPLICATION RATES WITH TANK-MIXES OF FINALE HERBICIDE:

BROADCAST APPLICATION RATES WITH TANK-MIXES OF FINALE HERBICIDE:

**Use a maximum of 4 WSP packets per acre on Daisy, Ice Plant, Ivy, and Periwinkle.

**Use a maximum of 8 WSP packets per acre or 4 lbs ai as a single application. The maximum number of applications that may be made per
year is two. The maximum single application rate is 4 lbs ai. A subsequent application can be made 4 months after previous treatment.

RONSTAR 50 WSP Herbicide controls the following annual grasses and broadleaf weeds at 4–8 WSP Packets per acre.

**Use a maximum of 4 WSP packets per acre on Daisy, Ice Plant, Ivy, and Periwinkle.

**Use a maximum of 8 WSP packets per acre or 4 lbs ai as a single application. The maximum number of applications that may be made per
year is two. The maximum single application rate is 4 lbs ai. A subsequent application can be made 4 months after previous treatment.

**Apply RONSTAR 50 WSP Herbicide and FINALE Herbicides as described on the respective labels. Follow the most restrictive label language.

**By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability. If terms are not accept-
able, return the unopened product container at once.

**By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability. If terms are not accept-
able, return the unopened product container at once.

able, return the unopened product container at once.
**Ronstar® 50 WSP Herbicide**

**Active Ingredient:** Oxadiazon

**Net Weight:** 1 Pound

**Non-Agricultural Use Requirements**

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not allow others to enter the treated area until sprays have dried.

**Storage and Disposal**

- Do not contaminate water, food or feed by storage or disposal.
- **Pesticide Storage**
  - Do not store in or around the home.

**Engineering Controls**

- When working around areas treated with unlabeled, registered, or restricted uses, do not use respirators, masks, or other protective clothing that is not appropriate for the conditions.
- Apply RONSTAR 50 WSP Herbicide with a properly calibrated sprayer that will apply the spray solution uniformly (uniform application is essential for satisfactory weed control). Calibrate the sprayer prior to use, according to the manufacturer’s directions and check daily to be certain that the equipment is working properly.

**Precautionary Statements**

**Warning**

**Hazards to Humans and Domestic Animals**

- Caution: Harmful absorbed through skin. Harmful if inhaled. Causes moderate eye injury. Do not get on skin or on clothing. Avoid breathing dust. Avoid contact with eyes.

**Personal Protective Equipment**

- Some materials that are chemical-resistant to this product are made of any water-resistant material. If you want more options, follow the instructions for category A on a chemical-resistance category selection chart.

**Engineering Controls**

- When working with unlabeled, registered, or restricted uses, do not use respirators, masks, or other protective clothing that is not appropriate for the conditions.

**User Recommendations**

- Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Users should remove clothing/dust immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately if the skin comes into contact with the pesticide.

**Environmental Hazards**

- Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning equipment or disposal of waste. RONSTAR® 50 WSP Herbicide should not be used in areas where irrigation or rainfall results in a direct or indirect discharge of contaminated surface waters through damaged or eroded soil to which oxadiazon is absorbed.

- Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

**Agricultural Use Requirements**

- Use this product only in accordance with the labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the storage of this substance on this label. Instructions for personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

- Do not enter or allow Warner entry into treated areas during the restricted-entry interval (REI) of 12 hours.

**Important:** PPE required for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, to coveralls, shoes plus socks, and chemical-resistant gloves made of any waterproof material.

**User Safety Recommendations**

- Apply RONSTAR 50 WSP Herbicide with a properly calibrated sprayer that will apply the spray solution uniformly (uniform application is essential for satisfactory weed control). Calibrate the sprayer prior to use, according to the manufacturer’s directions and check daily to be certain that the equipment is working properly.

**Precautionary Statements**

**Warning**

**Hazards to Humans and Domestic Animals**

- Caution: Harmful absorbed through skin. Harmful if inhaled. Causes moderate eye injury. Do not get on skin or on clothing. Avoid breathing dust. Avoid contact with eyes.

**Important:** PPE required for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, to coveralls, shoes plus socks, and chemical-resistant gloves made of any waterproof material.
D o not apply directly to w ater, or to areas w here surface w ater is present or to intertidal areas below  the m ean high w ater m ark. D o not contam i-
**User Safety Recommendations**

- Users should wash hands before eating, skating, swimming, or using tobacco.
- Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should not use a knife or other sharp object to break the soil. Only use the plastic lined paper bag to contain the product.
- Users should use the entire bottle before applying the product. Do not use any water-soluble package after the bottle is empty.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes. This product contains chemicals that may be toxic to aquatic organisms, and may harm beneficial aquatic life. Avoid contact with water; do not apply to bodies of water, including streams, ponds, lakes, oceans, or the Great Barrier Reef. Do not allow it to enter bodies of water by accidental or intentional discharge. Do not apply directly to water or to the surface of water. To protect the environment, avoid spraying in windy conditions. Do not apply this product when surface waters are polluted with suspended solids or debris.

**USE RESTRICTIONS**

- Do not use on or near any watercourse, fish and wildlife management area, wetland, marsh, estuary, or tidal area.
- Do not use on or near treated areas during the first week after application. Do not allow water to enter treated areas during the restricted entry interval (REI) of 12 hours.
- Do not contaminate soil or water supplies by leaking containers or other releases of the product. Do not use equipment for the purpose of feeding, watering, or treating animals or other animals.

**AGRICULTURAL USE REQUIREMENTS**

- Use this product only in accordance with the labeling and with the Worker Protection Standard (40 CFR part 190). This standard contains requirements for the protection of agricultural workers on farms, forest, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions on personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not use this product on or near water supplies, including streams, ponds, lakes, oceans, or the Great Barrier Reef.

**PREEMERGENCE HERBICIDE USE**

- Apply the product in the late winter or early spring prior to weed emergence. For best results, apply immediately after application. The maximum single application rate is 4 lbs ai/A. A subsequent application can be made 4 months after the previous treatment. To protect against damage by the activity growing, bermudagrass, irrigate the turf thoroughly. Do not use this product on or near any watercourse, fish and wildlife management area, wetland, marsh, estuary, or tidal area. Do not use this product on or near treated areas during the first week after application. Do not allow water to enter treated areas during the restricted entry interval (REI) of 12 hours. Pesticides required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is covered in Chapter 3 of this manual. Chemical-resistant gloves made of any waterproof material.
WOODY ORNAMENTAL SHRUBS AND TREES, CONIFER NURSERIES, AND ORNAMENTAL SHRUBS AND TREES

GENERAL USE INSTRUCTIONS: Must be applied by Registered Applicators only. Apply RONSTAR 50 WSP Herbicide prior to weed seed germination as a directed spray to the soil surface or as an over-the-top application on tolerant ornamentals used as ground cover listed on this label. RONSTAR 50 WSP Herbicide can be applied to both newly transplanted and established plants. Application can be made to Chip, growing or dormant plants. However, apply RONSTAR 50 WSP Herbicide prior to bud break or not until 4 weeks after bud break. Rainfall or irrigation (one-half inch) immediately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile. Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.

AMOUNT TO USE: Apply RONSTAR 50 WSP Herbicide broadcast, in a minimum of 50 gallons of water per acre (14 gallons of water per 1,000 sq ft). Reseeding of existing lawns before application. Apply a minimum of 8 WSP packets or 4 lbs ai as a single application. The maximum number of applications that may be made per year is two. The maximum single application rate is 4 lbs ai. A subsequent application can be made 4 months after previous treatment. For over-the-top sprays, irrigate within 2 hours after application, otherwise injury to the ornamentals may result.

ORNAMENTAL USE IN RESIDENTIAL PROPERTIES: RONSTAR 50 WSP Herbicide may be applied to landscape beds consisting of well-defined areas of solid or mixed stands of trees, shrubs, and grass covers located around buildings as well as in open areas of the residential property. When using Low Pressure Hand-Held Applicators, Professionals Applicators are to use only the 1.5 oz. RONSTAR 50 WSP Herbicide packets. Carefully measure the area of each bed to be treated to insure an accurate application rate.

Restrictions:
• Do not apply in greenhouse as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in conservatories.
• Do not mechanically mix RONSTAR 50 WSP Herbicide into the soil.
• Do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 WSP Herbicide is watered in and the soil surface is dry.
• Do not apply with adjuvants or drift control agents.
• Do not use more than 8 lbs of product/A/year (4 lbs ai/A/year), except in areas where there is heavy weed infestation. In areas of heavy infestation, do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 WSP Herbicide is watered in and move RONSTAR 50 WSP Herbicide into the upper soil profile. Sprinkle the irrigation into the two hours after application, otherwise crop injury may result. Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.
• Do not apply more than 16 lbs of product/A/year (8 lbs ai/A/year).
• Apply no more than 8 lbs of product/A/year (4 lbs ai/A/year).

Ronstar 50 Wsp Herbicide controls the following annual grasses and broadleaf weeds at 4-8 Ws packets per acre:

* Apply 6 to 8 water-soluble packets per acre (equivalent to 3-4 lbs ai/A). Do not exceed the rate intended for use.
** Apply 6 water-soluble packets per acre.

Do not use in California for control of Bristy Dasturtag, Cheeseweed, Fiddleneck, Fireweed, Shepherdspurge, Oxi, Yellow Woodsmoke, and Wild Oats.

**Tank-Mix combinations:** Tank-mix combinations of RONSTAR 50 WSP Herbicide plus a postemergent herbicide are recommended to control existing undesirable vegetation along public and private roadsides and rights-of-way, on commercial properties recreational parks, railways, rights-of-way, and rural, and on federal, state, and local parks and recreational areas. Applied as a directed spray, RONSTAR 50 WSP Herbicide plus a postemergent herbicide will provide preemergence and postemergence control of susceptible species listed on the respective labels.

A compatibility test must be conducted with the tank-mix partner with RONSTAR 50 WSP Herbicide as a mixture. Using a clear glass jar, conduct the test as described below.

1. Fill the jar three-quarters full with water.
2. Add the appropriate amount of herbicides in the following order: (a) dry powder, (b) wettable powder, (c) aqueous suspensions, (d) flowables, (e) liquids and solutions and emulsifiable or liquid concentrates. Shake or stir the jar after each addition to thoroughly mix.
3. After adding all ingredients, let the mixture stand for 15 minutes and then look for separation, large flakes, precipitations, gels, and heavy oil film on the jar or other signs of incompatibility.
4. If the compatibility test shows signs of incompatibility, do not tank-mix the product(s) tested with RONSTAR 50 WSP Herbicide.

**MIXING INSTRUCTIONS:** Add RONSTAR 50 WSP Herbicide to the spray tank solution and agitate prior to adding a tank-mix partner. Please refer to the tank-mix partner label for information on surfactant and spray volume to use. Mix the exact amount of spray needed for immediate application. Do not leave excess spray solution in the spray tank for an extended period of time as the tank-mix partners may settle out of solution.

Precautions and restrictions: Do not use tank-mix herbicide partners as an over-the-top spray in ornamentals without first consulting the tank-mix partner’s label for tolerable or susceptible ornamental varieties. To prevent injury to susceptible and desirable turfgrasses, trees, shrubs, or other intolerable plants, avoid contact of the spray solution with foliages, stems, green bark, or bare roots of these plants as severe plant injury may occur. If needed, equip the sprayer with a spray shield to help prevent the spray solution from contacting non-targeted plants. Apply the tank-mix partner as described on the label of the product.

*Do not use in California for control of Bristy Dasturtag, Cheeseweed, Fiddleneck, Fireweed, Shepherdspurge, Oxi, Yellow Woodsmoke, and Wild Oats.

** Consult State Agricultural Experiment Station or Extension Service weed specialists for specific recommendations for local weed problems and for information on possible lower doses.

*Do not use in California on Fit, Hemlock, and Blue Spruce.

**Use a maximum of 4 Ws packets per acre on Daisy, Ice Plant, ivy, and Periwinkle.
• Do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 W SP Herbicide is watered in and

• Do not apply more than 12 pounds of product per acre per year (6 lbs of ai/A/yr), except in areas where there is heavy weed infestation. In areas

• Do not apply in greenhouses as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in condensate.

Rainfall or irrigation (one-half inch) immediately after application of RONSTAR 50 W SP Herbicide will improve weed control and move RONSTAR 50 W SP Herbicide into the upper soil profile. Sprinkle irrigate the foliage within 2 hours after application, otherwise crop injury may result. Cultivating

Apply RONSTAR 50 W SP Herbicide to established ornamentals prior to bud break or not until 4 weeks after bud break.

The maximum amount allowed per year is 4 lbs (2 lbs of product/A/yr). The maximum amount of applications that may be made per year is 2 lbs of product/A/yr. A subsequent application can be made 4 months after the previous treatment. For tree and shrub plantings of ornamentals along public and private roadsides and rights-of-way, one-half inch of heavy infestation, apply no more than 16 lbs of product/A/yr (8 lbs ai/A/yr).

Do not apply more than 12 lbs of product/A/yr (6 lbs ai/A/yr), except in areas where there is heavy weed infestation. In areas of heavy infestation, apply no more than 16 lbs of product/A/yr (8 lbs ai/A/yr).

Do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 W SP Herbicide is watered in and the soil surface is dry.

Do not apply with adjuvants or drift control agents.

Do not permute people or pets to enter the treated area until after the directed spray application of RONSTAR 50 W SP Herbicide is watered in and the soil surface is dry. Do not apply more than 12 lbs of product/A/yr (6 lbs ai/A/yr), except in areas where there is heavy weed infestation. In areas of heavy infestation, apply no more than 16 lbs of product/A/yr (8 lbs ai/A/yr).

Do not apply with adjuvants or drift control agents.

Do not apply in greenhouses as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in condensate. Do not mechanically mix RONSTAR 50 W SP Herbicide into the soil. Do not apply to landscape plantings of ornamentals along public and private roadsides and rights-of-way, as commercial properties, recreational parks, railroad rights-of-way, and on federal, state, and local parks and recreational areas. Remove existing weeds before applying this product. Apply RONSTAR 50 W SP Herbicide to established ornamentals prior to bud break or not until 4 weeks after bud break. Rainfall or irrigation rain half month immediately after application of RONSTAR 50 W SP Herbicide will improve weed control and move RONSTAR 50 W SP Herbicide into the upper soil profile. Sprinkle irrigate the foliage within 2 hours after application, otherwise crop injury may result. Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.

AMOUNT TO USE: Apply RONSTAR 50 W SP Herbicide broadcast, in a minimum of 50 gallons of water per acre (14 gallons of water per 1,000 sq ft), to be broadcast at 4 to 8 lbs per acre as a single directed spray application to the soil. The maximum amount allowed per year is 12 lbs of product/A/yr (6 lbs ai/A/yr) except in areas where heavy infestation where the maximum amount allowed per year is 16 lbs of product/A/yr (8 lbs ai/A/yr). The maximum amount of applications that may be made per year is 2 lbs of product/A/yr. The maximum single application rate is 4 lbs ai/A. A subsequent application can be made 4 months after the previous treatment.

Restrictions:

Do not apply in greenhouses as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in condensate.

Do not mechanically mix RONSTAR 50 W SP Herbicide into the soil.

Do not apply more than 12 pounds of product per acre per year (6 lbs ai/A/yr), except in areas where there is heavy weed infestation. In areas of heavy infestation, apply no more than 16 lbs of product/A/yr (8 lbs ai/A/yr).

Do not apply more than 12 pounds of product per acre per year (6 lbs ai/A/yr), except in areas where there is heavy weed infestation. In areas of heavy infestation, apply no more than 16 lbs of product/A/yr (8 lbs ai/A/yr).

Do not apply with adjuvants or drift control agents. Do not apply with adjuvants or drift control agents.

Do not apply more than 12 lbs of product/A/yr (6 lbs ai/A/yr), except in areas where there is heavy weed infestation. In areas of heavy infestation, apply no more than 16 lbs of product/A/yr (8 lbs ai/A/yr).

Do not apply with adjuvants or drift control agents.

Do not apply with adjuvants or drift control agents.
WOODY ORNAMENTAL SHRUBS AND TREES, CONIFER NURSERIES, AND ORNAMENTAL SHRUBS AND PLANTS

GENERAL USE INSTRUCTIONS: Must be applied to the annual or biennial application. Apply RONSTAR 50 WSP Herbicide prior to weed seed germination as a directed spray to the soil surface or as an over-the-top application on tolerant ornamentals used as ground cover labeled on this label. RONSTAR 50 WSP Herbicide can be applied to newly transplanted and established plants. Application can be made to Chip, growing or dormant plants. However, apply RONSTAR 50 WSP Herbicide prior to bud break or not until 4 weeks after bud break. Rainfall or irrigation one-half inch immediately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile. Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.

AMOUNT TO USE: Apply RONSTAR 50 WSP Herbicide broadcast in a minimum of 50 gallons of water per acre (1.14 gallons of water per 1,000 sq ft.) to establish ornamentals at 4 to 8 WSP packets per acre as a single directed spray application on soil surface. Apply a maximum of 6 to 8 WSP packets per acre as a single directed spray application to areas of heavy infestation. The maximum number of applications that may be made per year is two. The maximum single application rate is 4 lbs ai/A. A subsequent application can be made 4 months after previous treatment. For over-the-top sprays, irrigate within 2 hours after application, otherwise injury to the ornamentals may result.

ORNAMENTAL PLANTS IN RESIDENTIAL PROPERTIES: Apply RONSTAR 50 WSP Herbicide may be applied to landscape beds consisting of well-defined areas of solid or mixed stands of trees, shrubs, and ground covers located around buildings as well as in open areas of the residential property. When using Low Pressure Handcart Applicators, Professional Applicators are to use only the 1.5 oz. RONSTAR 50 WSP Herbicide packets. Carefully measure the area so each be to be treated to insure an accurate application rate.

Restrictions:
- Do not apply in greenhouse as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in greenhouse.
- Do not mechanically mix RONSTAR 50 WSP Herbicide into the soil.
- Do not permit people or pets to enter the treated area until after the directed spray application of RONSTAR 50 WSP Herbicide is watered in and the soil surface is dry.
- Do not apply with adjuvants or drift control agents.
- Do not apply more than 12 lbs of product/A/year (6 lbs ai/A/year), except in areas where there is heavy weed infestation. In areas of heavy infestation, do not apply more than 8 lbs of product/A/app (4 lbs ai/A/app).
- Rainfall or irrigation (one-half inch) immediately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile. Sprinkle irrigate the foliage within 2 hours after application, otherwise crop injury may result. Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.

** Use a maximum of 4 WSP packets per acre on Daisy, Ice Plant, Ivy, and Periwinkle.

PLANT TOLERANCE: RONSTAR 50 WSP Herbicide can be used as a directed or over-the-top spray application in a minimum of 50 gallons of water per acre on the following ornamental species.

<table>

WOODY ORNAMENTAL SHRUBS AND TREES, CONIFER NURSERIES, AND ORNAMENTAL PLANTS

GENERAL USE INSTRUCTIONS: Must be applied to the site according to the label. Apply RONSTAR 50 WSP Herbicide prior to weed seed germination as a directed spray to the soil surface or as an over-the-top application on tolerant ornamentals used as ground cover listed on this label. RONSTAR 50 WSP Herbicide can be applied to both newly transplanted and established plants. Application can be made to Chp., growing or dormant plants. However, apply RONSTAR 50 WSP Herbicide prior to bud break and no later than 4 weeks after bud break. Rainfall or irrigation (one-half inch) immediately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile. Cultivating or disturbing the soil after application may reduce weed control by disrupting the herbicide barrier.

AMOUNT TO USE: Apply RONSTAR 50 WSP Herbicide broadcast, in a minimum of 50 gallons of water per acre (1 1/4 gallons of water per 1,000 sq ft). Rainfall and irrigation (one-half inch) immediately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile. Sprinkle irrigation into the tank-mix partner label for information on surfacetant and spray volume to use. Mix the exact amount of spray needed for immediate application. Do not leave excess spray solution in the spray tank for an extended period of time as the tank-mix partners may settle out of solution.

PRECAUTIONS AND RESTRICTIONS:
- Do not apply in greenhouses as plant injury may result from co-distillation of Ronstar active ingredient onto leaf surfaces in condensate.
- Do not mix or apply RONSTAR 50 WSP Herbicide and FINALE herbicides as described on the respective labels. Follow the most restrictive label language.
- Do not use tank-mix herbicide partners as an over-the-top spray in ornamentals without first consulting the tank-mix-partner label for tolerable or susceptible ornamental varieties.
- Do not apply RONSTAR 50 WSP Herbicide as directed spray application in or around lawns or on federal, state, and local parks and recreational areas. Remove existing weeds before applying this product.

AMOUNT TO USE:
- Apply 6 to 8 water-soluble packets per acre (equivalent to 3-4 lbs ai/A). Apply the higher rate with expected heavier weed infestations.
- Apply RONSTAR 50 WSP Herbicide prior to weed seed germination as an over-the-top spray or directed spray application to landscape plantings of ornamentals used as ground cover listed on this label. Application can be made to Chp., growing or dormant plants. Rainfall and irrigation (one-half inch) immediately after application of RONSTAR 50 WSP Herbicide will improve weed control and move RONSTAR 50 WSP Herbicide into the upper soil profile. Sprinkle irrigation into the tank-mix partner label for information on surfactant and spray volume to use. Mix the exact amount of spray needed for immediate application.
- Do not apply more than 8 lbs of product/A/yr (4 lbs ai/A/yr) without consulting the tank-mix-partner label for tolerable or susceptible ornamental varieties.
- Do not apply with adjuvants or drift control agents.
- Do not mix or apply RONSTAR 50 WSP Herbicide and FINALE herbicides as described on the respective labels. Follow the most restrictive label language.

PLANT TOLERANCE:
- Do not use in California for control of Brittlebush, Cheeseweed, Fiddleneck, Fireweed, Shepherdspurse, Saw Thistle, Annual Bluegrass, Annual Sedge, Ragged Brome, and Wild Oats.
- Applied as a directed spray, RONSTAR 50 WSP Herbicide plus a postemergence herbicide will provide preemergence and postemergence control of susceptible species listed on the respective labels.
