GENERAL INFORMATION

RENEGADE® is a unique blend of nonionic surfactant, modified seed oil, ammonia and buffering agents that enhances retention and penetration of herbicides on weed surfaces. RENEGADE® raises the pH of the spray solution which aids in prolonging the activity of some herbicides in the spray tank. RENEGADE® will maximize the performance of products such as Accent®, Betamix®, Betanex®, Progress®, Pursuit®, Stinger® and UpBeet®. Do not use with Assert® herbicide.

Agitate while mixing and during spraying, do not allow spray mixture to set in tank. Flush sprayer between loads.
