## FIFRA 24(c) Special Local Need Label (SLN)

For Distribution and Use Only in the State of Montana  
Control of Spotted Wing Drosophila in Cherry

### Entrust<sup>®</sup>

EPA Reg. No. 62719-282

SLN MT-12-0005

**This label expires and must not be distributed or used in accordance with this SLN registration after December 31, 2017**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

Refer to product label for Entrust for Use Precautions, Mixing Directions, and Application Directions.

**Application Timing:** Treat when pests appears and crop is becoming susceptible (e.g., around the blush or pink stage) to spotted wing drosophila (SWD). Fruits become more susceptible as harvest approaches. Later harvested cultivars are at greater risk from SWD.

**Application Rate:** Apply 1.5 to 2.5 oz of Entrust per acre as a foliar spray to control SWD. Use a higher rate in the rate range for moderate to severe pest infestations. Heavy infestations may require repeat applications, but follow resistance management guidelines.

#### Specific Use Restrictions:

- **Preharvest Interval:** Do not apply within 3 days of harvest.
- Allow at least 7 days between applications.
- Do not apply more than 2.5 oz of Entrust (0.125 lb ai) per acre per application.
- Do not apply more than a total of 5 oz of Entrust (0.25 lb ai) per acre within 10 days of harvest.
- Do not apply more than a total of 9 oz of Entrust (0.45 lb ai) per acre per year.
- **Resistance Management:** Do not make more than three consecutive applications of Group 5 insecticides (spinetoram and spinosad) within a crop season.
- **Chemigation:** For use under this SLN label, do not apply this product through any type of irrigation system.
