DIPLOMAT is a low-use rate, oil based adjuvant that enhances performance of spray applications. **DIPLOMAT** replaces traditional crop oil concentrates and is formulated to be used at lower rates.

DIRECTIONS FOR USE

DIPLOMAT increases the effectiveness of pesticides and is designed for use with certain pesticides. Always follow the label of the specific pesticide for detailed adjuvant use directions. **DIPLOMAT** may be used for agricultural, commercial and industrial uses with pesticides labeled accordingly.

The following use rates are considered to be adequate for most applications. Some pesticides may require different rates for optimum effect.

Ground and Aerial Applications:

Dilute with water and apply at 0.375 - 0.5 % volume/volume for pesticides suggesting 1% v/v crop oil concentrate.
(3-4 pints/100 gallons of spray)

Dilute with water and apply at 1 pint per acre for pesticides suggesting 1 quart per acre crop oil concentrate.

For total carrier volumes less than 13 GPA, use 1 pint of **DIPLOMAT** per acre.

Mixing:

Fill spray tank half-full with water. Then add pesticide per label recommendations and continue filling. Add proper amount of **DIPLOMAT** last, and continue agitation.

USE PRECAUTIONS

DIPLOMAT increases the effectiveness of some pesticides. During periods of high temperatures and/or extreme humidity, some pesticides may become more active. It is recommended that a small test area be treated if such conditions prevail. Test areas are also recommended in the treatment of new crop varieties or highly inbred crop lines.

STORAGE & DISPOSAL
