ADMIRE® PRO Systemic Protectant

For Control of Aphids on Pecans.

EPA Reg. No. 264-827

EPA SLN. No. CA-050014

24(c) Supplemental Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF CALIFORNIA

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

PECAN

Pests Controlled	Rate fluid ounces/Acre
Yellow aphid complex Black pecan aphid	7-14
<p>Restrictions Pre-Harvest Interval (PHI): 7 days Maximum ADMIRE PRO allowed per crop season: 14 fluid ounces/Acre (0.5 lb AI/Acre)</p> <p>Applications Apply specified dosage in one of the following methods: 1. Chemigation into root-zone through microsprinkler irrigation systems. Pre-wet soil prior to applications of ADMIRE PRO. 2. Shank or subsurface side-dress, injected to a depth just above or just within the root zone and between the trunk and drip line of the tree canopy. Product should be applied in a minimum of 10 gallons of water per acre using multiple shanks on both sides of trees. Ensure product placement is below sod or orchard floor debris. Irrigation should follow within 48 hours to promote uptake by root system.</p> <p>Remarks For optimum results, apply prior to or at onset of pest infestation. Use the higher rates when applied by shank or subsurface sidedress, used on larger trees, and/or where extended control is desired. Under some conditions, control may not occur for 14 or more days or until two (2) irrigations have been made.</p> <p>Note Regardless of formulation or type of application (soil or foliar), do not apply more than a total of 0.5 lb active ingredient of ADMIRE PRO or PROVADO® per acre per season.</p>
