ENVIRONMENTAL HAZARDS

Do not contaminate water sources by cleaning of equipment or disposal of washwaters.

GENERAL INFORMATION

DYNE-AMIC® is a proprietary blend of highly effective nonionic surfactants and a refined and modified spray oil. It is designed for use with those pesticides or products whose labels recommend the addition of a spray adjuvant to improve coverage.

The addition of DYNE-AMIC® to a spray tank solution will improve a spray application by physically modifying the deposition and wetting characteristics of the spray solution, the result being a more uniform spray deposit. Although DYNE-AMIC® can affect positively the spray application, optimum application and effect can be affected by, but is not limited to, the pesticide or product, the carrier, crop, pest, spray equipment, spray volume and pressure, droplet size and environmental factors.

DIRECTIONS FOR USE

BEFORE USING THIS PRODUCT, READ ALL PRECAUTIONS, DIRECTIONS FOR USE, CONDITIONS OF SALE - LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES. FOR USE WITH PRODUCTS REGISTERED FOR: AGRICULTURAL, AQUATIC, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, ORNAMENTAL, RIGHTS-OF-WAYS, TURF AND OTHER USES.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be dispersed of on site or at an approved waste disposal facility. Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment washwaters, or spray waste.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

GENERAL RECOMMENDATIONS

The addition of a spray adjuvant to some pesticide or pesticide tank mix combinations may cause phytotoxicity to the foliage and/or fruit of susceptible crops or plants.

Consequently, prior to the use of DYNE-AMIC® in a spray tank mix or prior to the application of a tank mix with a product where a nonionic spray adjuvant is not specifically recommended but not prohibited by the products label, the user or application advisor must have experience with the combination under similar environmental and cultural conditions, or have conducted a phytotoxicity test under these same conditions.

USE: May be applied by Ground, Aerial, CDA or aquatic spray equipment.

Ground, Aquatic: Use 3 – 5 pints per 100 gallons of spray solution.

Aerial, CDA: Use 3 – 5 fl. oz. in 1 – 5 gallons of spray solution.

Use 3 oz. in 1 - 3 gal. and 5 oz. above 3 gal.

NOTE: Some pesticide labels may recommend higher or lower rates of spray adjuvant. When this occurs follow the pesticide label's recommendation.

MIXING

1. Prior to any pesticide application all spray mixing and application equipment must be clean. Carefully observe all cleaning directions on the pesticide label. To prevent or minimize foaming, fill tank to 2/3 to 3/4 full of water and add an anti-foaming agent such as FOAMBUSTER to the spray tank before pesticides, nutrients or DYNE-AMIC® are added.
2. Add pesticides and/or fertilizers as directed by label or in the following sequence:
 - A. Micronutrients and fertilizers
 - B. Dry flowables and dispersible granules
 - C. Flowables
 - D. Water soluble pesticides
 - E. Emulsifiable concentrates
3. Continue agitation.
4. Add DYNE-AMIC® and mix for 1 to 2 minutes with lower than normal agitation.
5. Continue filling tank maintaining minimal agitation.
6. For optimum results, spray mixes containing DYNE-AMIC® should be applied within 36 hours after mixing.
