## **Celsius® WG Herbicide**

**EPA Reg. No. 432-1507**

**For suppression of annual bluegrass (*Poa annua*) when treated early postemergence.**

**FIFRA Section 2(ee) Recommendation:** This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This product bulletin should be in the possession of the user at the time of application of the product. All applicable directions, restrictions and precautions on the EPA registered label are to be followed. **This product bulletin should be in the possession of the user at the time of application of the product.**

### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its label.

### **Early postemergence suppression of *Poa annua*.**

#### **Timing of Application**

CELSIUS WG Herbicide should be applied in late fall or early winter, typically before mid-December, for suppression of newly emerged *Poa annua*. CELSIUS WG Herbicide will not control mature *Poa annua* plants or plants not yet emerged. Established plants should be controlled with an alternative, appropriate postemergence herbicide. *Poa annua* suppression with CELSIUS WG may be reduced if application is made in the presence of heavy dew, fog, or mist/rain.

#### **Use Rates**

Apply CELSIUS WG Herbicide at 2.5 to 4.9 oz/A. No more than 7.4 oz/A CELSIUS WG can be applied in a 12-month period. No single application of CELSIUS WG Herbicide may exceed 4.9 oz/A.

### **IMPORTANT**

Refer to the CELSIUS WG Herbicide label for additional information and use directions. The most restrictive provision of any label should apply.
