

SPECIMEN

# Green Lawnger®

# Turf paint and divot mix colorant

A long-lasting green paint for turf use

- ColorLock™ produces greener UV-resistant color
- Recommended for athletic fields, golf courses, commercial and residential lawns
- Adds healthy appearance and beauty to all turf grasses

## FOR PROFESSIONAL USE ONLY Keep Out of Reach of Children

This product does not require a hazard warning in accordance with GHS criteria.

Net Contents:

BASF Corporation 26 Davis Drive, Research Triangle Park, NC 27709 Green Lawnger<sup>®</sup> with ColorLock<sup>™</sup> Technology is an advanced colorant formulation that resists the harsh effects associated with long periods of high temperature and intense UV light exposure. Green Lawnger restores the natural green color to turf during dormant periods. Green Lawnger may also be pre-applied to divot mix sand, giving the mix a natural green color. Green Lawnger contains no hazardous chemicals, heavy metals, or other inert ingredients known to be harmful to turf.

### **Directions For Use**

**Dormant Application:** Dilute one gallon (3.78 L) of **Green Lawnger** with 7 to 9 gallons (26-34 L) of water. For a darker turf color, reduce the volume of water. Some experimentation may be required with the water-to-colorant ratio to obtain the exact color desired. **Green Lawnger's** color will last the entire dormant season.

**Non-Dormant Application:** Dilute one gallon (3.78 L) of **Green Lawnger** with 15 to 20 gallons (56-75 L) of water. Adjust the **Green Lawnger**-to-water dilution ratio to achieve the desired color.

For best results on any discolored area, two applications are recommended to blend the targeted application area with the surrounding healthy turf. The second application should be made perpendicular to the first application pattern to improve coverage and color uniformity across the spray area.

**Divot Mix Sand:** Mix 6 ounces (177 ml) of **Green Lawnger** with the same volume of water. Spray or pour the solution onto 100 lbs. (45 kg) of divot mix sand in a cement-type mixer.

**Equipment Notice**: BASF recommends the use of **Teflon**<sup>®</sup> seals to aid in the prevention of leaks when using **Green Lawnger** in centrifugal pumps. Standard ceramic seals may leak during operation.

### **Application Tips**

Before applying **Green Lawnger**, cut turf to desired height. One gallon (3.78 L) of **Green Lawnger** will cover 4,000 to 12,000 square feet (370-1115 m2) of turf. The area covered will vary with the rate of **Green Lawnger** used, type and condition of grass being treated, and turf color desired. Typically a 1:7 colorant-to-water ratio is recommended on dormant turf, and a 1:15 ratio on other turf.

### Shake well before mixing.

Mix in water solution until colorant is uniformly dispersed. Adjust the colorant-to-water ratio to achieve

the desired color. A spray shield is recommended for applications if overspray or drift is a potential problem.

For best results, cover leaf blade uniformly with fine particle-sized droplets using flat fan spray tips. Avoid excessive run off from the leaf blade to soil surfaces. Nozzle type, pressure, flow rate and spray angle will all affect product distribution. Use low to medium sprayer pressure.

Avoid overspray on concrete, masonry or any other objects where color is not desired. Permanent staining may occur. Accidental overspray should be removed immediately by a water rinse before the product dries. To prevent rub-off on shoes, clothing, and uniforms, allow **Green Lawnger** to dry completely on the turf prior to use.

**DO NOT** leave any unused colorant spray solution overnight in application equipment.

All spray equipment should be thoroughly rinsed and flushed - spray tanks, hoses, valves, pumps, spray nozzles and all in-line screens immediately following use.

If this product is mixed with pesticides, the entire mixture, including rinsate, must be handled and disposed of according to all applicable local, state and federal guidelines.

### Storage and Disposal

**Storage:** Segregate from foods and animal feeds. Keep away from heat. Protect from direct sunlight.

**Waste Disposal of Substance:** Must be disposed of or incinerated in accordance with local regulations.

**Container Disposal:** Contaminated packaging should be emptied as far as possible and disposed of in the same manner as the substance/product.

Accidental Release Measures: Do not discharge into the subsoil/soil. Do not discharge into drains/surface waters/groundwater. For small amounts: Pick up with suitable absorbent material (e.g. sand, sawdust, general-purpose binder, kieselguhr). For large amounts: Dike spillage, Pump off product. Dispose of absorbed material in accordance with regulations. Collect waste in suitable containers, which can be labeled and sealed. Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations.
