Prime Oil®
Crop Oil Concentrate

PRINCIPAL FUNCTIONING AGENTS
Phytobland Paraffinic Oil .................................................................................. 83.00%
Alkylphenol ethoxylate, and tall fatty acids .............................................................................. 15.47%

CONSTITUENTS INEFFECTIVE
AS SPRAY ADJUVANTS ...................................................................... 1.53%
TOTAL ............................................................................................... 100.00%

Contains Petroleum Distillates
All ingredients are exempt from the requirements of a tolerance in 40 CFR 180.

STOP- READ LABEL BEFORE USING.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS
Harmful if swallowed, inhaled or absorbed through skin. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with skin, eyes, or clothing. Wear chemical-resistant gloves when mixing or handling product. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

GENERAL INFORMATION

PRIME OIL is a premium crop oil concentrate, consisting of a blend of special nonionic surfactants with phytobland (non-phytotoxic) oil. It is designed for use with a broad range of pesticides including herbicides, insecticides*, fungicides* and/or fertilizers* and micronutrients*. PRIME OIL increases contact activity of the spray, aids in penetration of plant cuticle, and provides uniform coverage of leaf surfaces. Optimum application and effects can be influenced by the crop, pest, spray equipment, spray volume, pressure, droplet size, spray mixture and environmental factors. Consequently, it is recommended that careful observations of the spray deposit be made and PRIME OIL concentrations be adjusted accordingly.

*Not for use with these products in California

PREPARATION OF SPRAYS

To prepare agricultural sprays containing PRIME OIL, fill the spray tank half full with water, add the proper amount of pesticide, fertilizer, or micronutrient as directed by its label, and then add the PRIME OIL, agitating during the entire process. Continue to agitate while filling the tank with water and agitate before and during each application to insure a uniform spray.

DIRECTIONS FOR USE (EXCEPT CALIFORNIA)

Sprays containing PRIME OIL and pesticides, fertilizers, or micronutrients should be applied from the same equipment and in the same manner as the pesticides, fertilizers, or micronutrients would be applied alone.

GROUND: When ground equipment is used to make the applications, use 1 to 4 pints of PRIME OIL in 20 to 100 gallons of water with proportionately less spray volume for band treatments. Do not exceed 2.5% v/v concentration.

AERIAL, LOW VOLUME, CDA: Use 2-8 fluid ounces per acre or follow recommendations on the pesticide label if higher rates are required. When applying aerially, follow pesticide label directions including minimum water volume per acre. Do not substitute PRIME OIL for water required by the pesticide label.

NOTE: The above use recommendations are considered to be adequate for most uses. Some pesticides, however, may require higher rates for optimum effect. Follow the pesticide label directions when this occurs.

FOR TERRESTRIAL USE ONLY - NOT FOR AQUATIC USE

CALIFORNIA DIRECTIONS FOR USE WITH HERBICIDES ONLY

Sprays containing PRIME OIL and herbicides should be applied from the same equipment and in the same manner as the herbicides would be applied alone.

GROUND: When ground equipment is used to make the applications, use 1 to 4 pints of PRIME OIL in 20 to 100 gallons of water with proportionately less spray volume for band treatments. Do not exceed 2.5% v/v concentration.

AERIAL, LOW VOLUME, CDA: Use 2-8 fluid ounces per acre or follow recommendations on the herbicide label if higher rates are required. NOTE: When applying aerially, follow herbicide label directions including minimum water volume per acre. Do not substitute PRIME OIL for water required by the herbicide label.

NOTE: The above use recommendations are considered to be adequate for most uses. Some herbicides, however, may require higher rates for optimum effect. Follow the pesticide label directions when this occurs.
NOTE: Care should be exercised when sprays containing PRIME OIL are applied to new crop varieties or highly inbred crop lines not previously treated with PRIME OIL. Care is also recommended when sprays are applied under very humid conditions or under circumstances where the sprays tend to be more active. In new uses it is recommended that small test areas be treated before undertaking large scale applications.

Read and follow all information on the label of the pesticide, fertilizer or micronutrient with which PRIME OIL is used. Do not use PRIME OIL where the label of the pesticide, fertilizer, or micronutrient specifically warns against such use.

STORAGE AND DISPOSAL

Storage
Keep this container tightly closed and do not allow water to be introduced. Do not store near feed or food products. Do not contaminate water by cleaning of equipment or disposal of spray waste.

Container Disposal
Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. Contact your state and local ACRC recycler or visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

Notice of Warranty
Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
