

# COMPLETE COMPATIBILITY®

## COMPATIBILITY AGENT and ACIDIFIER

### PRINCIPAL FUNCTIONING AGENTS:

Alcohol ethoxylate phosphate ester, isopropanol, .....	60.0%
dipropylene glycol monomethyl ether	
COMPOUNDS INEFFECTIVE AS SPRAY ADJUVANT.....	40.0%
TOTAL.....	100.0%

All ingredients are exempt from tolerance requirements under 40 CFR 180.

### KEEP OUT OF REACH OF CHILDREN

### WARNING

Causes serious eye irritation. Causes skin irritation. Harmful if swallowed.

### PRECAUTIONARY STATEMENTS

Wash hands thoroughly after handling. Wear eye and face protection and protective gloves. Do not eat, drink or smoke when using this product. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org). Decontaminated containers may also be disposed of in a sanitary landfill.

IN EVERY CASE, THE PESTICIDE LABEL PRECAUTIONS MUST BE FOLLOWED AND THIS PRODUCT MUST BE USED IN ACCORDANCE WITH PRODUCT LABEL DIRECTIONS.

### FIRST AID

**IF IN EYES:** Rinse cautiously with water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical attention.

**IF ON SKIN:** Wash with plenty of water. If skin irritation occurs: Get medical attention. Take off contaminated clothing and wash before reuse.

**IF SWALLOWED:** Immediately call a poison control center or doctor for treatment advice. Rinse mouth.

### GENERAL INFORMATION

COMPLETE COMPATIBILITY is an anionic formulation that aids in the blending of liquid fertilizers with pesticides and pesticides with other pesticides in tank mixes.

COMPLETE COMPATIBILITY may be used with pesticides registered for use on all agricultural, forestry, industrial, non-cropland, rights-of-way, turf and municipal and other uses.

### THE NEED FOR COMPATIBILITY AGENTS

Problems can occur with fertilizer and pesticide combinations because of different physical and chemical properties in the tank mix. Some types of problems are inadequate dispersion, wetting, emulsion or solution stability and lumping. To determine the need for this product or insure that problems with the tank mix are minimized, follow the testing procedure described below:

WA Reg. No. 1381-50009

**AgriSOLUTIONS™**

IN THIS TEST, ONE TEASPOON PER GALLON IS EQUAL TO APPROXIMATELY ONE PINT PER 100 GALLONS FOR PESTICIDE AND LIQUID FERTILIZER TANK MIXES.

Potential tank mixes should be tested before use. Liquid fertilizer/pesticide tank mixes or pesticide tank mixes may be tested as follows:

1. Measure one gallon of liquid fertilizer or water in a clean clear container.
2. Add one teaspoon of COMPLETE COMPATIBILITY (1 pint rate) to the liquid and mix well.
3. Add each pesticide or adjuvant (following label mixing order/jar test instructions) to the solution and shake well to mix before adding next material until all the tank mix components have been added.

Allow the mixture to stand for at least 15 minutes. If the mixture is oily, lumpy or otherwise unacceptable, repeat the test using the same amount of fertilizer and/or pesticide, and increase the amount of COMPLETE COMPATIBILITY to two teaspoons (2 pint rate) and mix. The solution should remain stable for at least 30 minutes. If this does not solve the problem, increase the amount of COMPLETE COMPATIBILITY to three teaspoons (3 pint rate). If the problem still exists after trying the 3 pint rate, make a pre-mix of each pesticide and water then retry compatibility test. Premixing often increases compatibility when adding dry pesticides like wettable powders or when adding pesticides to liquid fertilizer, especially cold liquid fertilizer.

COMPLETE COMPATIBILITY may be added to fertilizer grades as follows:

1 to 3 pints per 100 gallons

--- 25-0-0, 28-0-0, 30-0-0, and 32-0-0

2 to 3 pints per 100 gallons

--- 20-20-20, 20-5-5, 15-15-0, 15-10-8, 15-10-6, 12-48-8, 12-12-8, 10-34-0, 10-24-0, 10-15-5, 10-5-5, 8-24-0, 8-16-8, 7-21-7, 6-16-6, 5-23-5, 5-10-10, 4-10-10, 5-20-12

### DIRECTIONS FOR USE

#### For Terrestrial Use Only – Not for Aquatic Use

The best method of use is to add the COMPLETE COMPATIBILITY to the fertilizer with the agitation on before adding the pesticide.

Use 1 to 3 pints of COMPLETE COMPATIBILITY per 100 gallons of liquid nitrogen/pesticide tank mixture (see fertilizer grades above).

Use 1 to 3 pints of COMPLETE COMPATIBILITY per 100 gallons of pesticide tank mix. Apply as soon as possible after mixing. If mixture is allowed to stand for any length of time, check to make sure the mixture is still smooth and agitate before using.

**COMPLETE COMPATIBILITY pH Recommended Use Chart**  
Starting pH

		9	8	7	6	
<b>Desired pH</b>	<b>8</b>	2	0	0	0	This chart is a guide to the approximate quantity of COMPLETE COMPATIBILITY required to reduce the pH of 100 gallons of water.
	<b>7</b>	4	2	0	0	
	<b>6</b>	16	12	8	0	
	<b>5</b>	24	16	12	8	
						Oz. of COMPLETE COMPATIBILITY per 100 gallons of water

#### Instructions for use of chart:

1. Test the pH of the water to be used in your tank mix by using a pH test kit.
2. Determine the desired pH for the pesticide to be tank mixed. Typically, spray tank mixtures are most effective at pH's between 5 and 7.

3. Determine the approximate quantity of COMPLETE COMPATIBILITY to be added to each 100 gallons of the tank mix by reading across the chart from the starting pH and down to the desired pH on the left side.

**NOTE:** When applying aurally, follow pesticide label directions including minimum water volume per acre. Do not substitute COMPLETE COMPATIBILITY for water required by the pesticide label.

#### **Notice of Warranty**

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
