

## 2(ee) Recommendation

Use information in accordance with Section 2(ee) of FIFRA

### **DUPONT™ FIRSTSHOT® SG BURNDOWN HERBICIDE (with TotalSol® soluble granules)**

EPA Reg. No. 352-755

### **FOR CONTROL OR SUPPRESSION OF ADDITIONAL WEED SPECIES BEFORE PLANTING RICE IN THE STATES OF AR, LA, MO, AND MS**

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

A tank mixture of DuPont™ FirstShot® SG burndown herbicide (with TotalSol® soluble granules) at 0.8 ounces per acre in combination with glyphosate may be applied for improved control of weeds prior to planting rice. Rice may be planted any time after the application of FirstShot® SG.

FirstShot® SG plus glyphosate will provide control of alligatorweed and suppression‡ of juncus, spikerush, bull tongue (lanceleaf arrowhead), red ludwigia, narrowleaf aster, and hyssop.

The addition of a nonionic surfactant (NIS) at 0.25% to 0.5% v/v (1 to 2 quarts per 100 gallons of spray) to FirstShot® SG plus glyphosate tank mix may improve weed control since glyphosate products differ in their adjuvant contents. Ammonium sulfate (AMS) may also be added to this tank mix if it is recommended on the glyphosate label. See glyphosate label for specific surfactant and AMS recommendations.

Refer to the glyphosate label for further application information and use restrictions. Follow the label guidelines that are the most restrictive.

‡ Weed suppression is a reduction in weed competition (reduced population and/or vigor) as visually compared to an untreated area. The degree of suppression varies with the size of the weeds and the environmental conditions following treatment.
