SURFACTANTS

Unless otherwise specified, add a DuPont recommended nonionic surfactant having at least 80% active ingredient at 1 to 2 qt per 100 gal of spray solution (0.25 to 0.5% v/v) when ALLY® EXTRA SG is used in a tank mix with WideMatch or Colt AS.

Consult your agricultural dealer, applicator, or DuPont representative for a listing of recommended surfactants. Antifoaming agents may be used if needed.

Do not use low rates of liquid nitrogen fertilizer solution as a substitute for surfactant.

IMPORTANT PRECAUTIONS

Refer to the ALLY® EXTRA SG and/or WideMatch or Colt AS, and any other tank mix partner, labels for information on weed species controlled, additional use directions, restrictions, rotational crop intervals and precautions. The most restrictive provision on any label shall apply.

Read and follow all manufacturer’s label recommendations for the companion products. If those recommendations conflict with this label, do not tank mix the herbicide with ALLY® EXTRA SG.
