DUPONT™ HARMONY® SG HERBICIDE (with TotalSol® soluble granules)

EPA Reg. No. 352-633

DUPONT™ HARMONY® SG HERBICIDE (with TotalSol® soluble granules) PLUS GLYPHOSATE TANK MIX FOR WEED CONTROL IN ROUNDUP READY¹ SOYBEANS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DuPont™ HARMONY® SG herbicide (with TotalSol® soluble granules) at 0.125 (1/8) oz per acre may be tank mixed with glyphosate for control of certain broadleaf weeds in Roundup Ready soybeans.

For tank mixes of HARMONY® SG plus glyphosate herbicide, always read and follow all use directions, restrictions, and precautions on the EPA approved labels. When tank mixing, the most restrictive labeling applies.

The tank mix of HARMONY® SG plus glyphosate herbicide (such as Roundup UltraMax¹ or Touchdown²) is for use on soybeans designated Roundup Ready. Severe injury or death of soybeans will result if any soybeans not designated as Roundup Ready are treated with these tank mixes.

RESTRICTION

This product is limited to ground application only in the State of New York. Do not apply by air in that state.

Application Information

Timing to Crop

HARMONY® SG plus glyphosate herbicide tank mix may be applied any time after the first trifoliolate has expanded fully before soybeans are harvested.

Rate and Weed Size

For improved control of common lambsquarters and/or wild buckwheat, tank mix 0.125 (1/8) ounce per acre of HARMONY® SG. Refer to the HARMONY® SG and glyphosate manufacturer's labels for other weeds which may be controlled or suppressed and the maximum size at application. For best results, apply to small, actively growing weeds.

Adjuvants

When tank mixing HARMONY® SG with glyphosate, it is recommended to add ammonium sulfate (AMS) at 4.25 - 17 pounds per 100 gal of spray mixture. See the glyphosate manufacturer's label for specific ammonium nitrogen recommendations. When Velvetleaf is present, ammonium sulfate is required at a minimum rate of 2 lb per acre. The addition of surfactant at 0.125 - 0.25% v/v (1-2 pt per 100 gal spray mixture) to some HARMONY® SG plus glyphosate tank mixes may improve weed control. Glyphosate products differ in their adjuvant contents. Glyphosate products such as Glyphomax³ or Roundup Original¹ allow for addition of surfactants. See the manufacturer's specific surfactant recommendations.

Precautions

Early-season soybean injury may result from applications of this tank mix. Injury may manifest itself as stunting (seen as a reduction in leaf size or internode length), yellowing leaves and/or red veins, and necrosis in the leaves and petioles. The potential for soybean injury is most pronounced with applications made during hot, humid conditions, under widely fluctuating weather or temperature conditions, or with applications to soybeans under stress.

**IMPORTANT
BEFORE USING THIS PRODUCT, READ AND
CAREFULLY NOTE THE CAUTIONARY
STATEMENTS AND OTHER PROCEDURAL
INFORMATION APPEARING ON THE EPA
REGISTERED LABEL OR ON OTHER SUP-
PLEMENTAL LABELS.**

This bulletin contains new or supplemental instructions for use of these products in combination which does not appear on the package label. Follow the instructions carefully.
