Fall Planted Wheat, Rye and Barley Nutrient Management Cover Crops, non-food/feed to be planted to Field Corn or Soybeans in the Spring.	ALS, Glyphosate resistant marestail (rosette no-taller than 3 inches) ALS resistant common chickweed (no wider than 3 inches)	12 to 14 oz/A (0.34 to 0.39 lbs ai/A)

DIRECTIONS FOR USE:

- Apply in the fall for control of above listed weeds in nutrient management systems where fall planted wheat, rye or barley cover crops are planted for non-food/feed uses and will be planted to field corn or soybeans in the spring.
- Apply Authority MTZ DF as a broadcast spray with either ground or aerial application equipment. Use a minimum of 10 gallons of finished spray per acre by ground or 5 gallons finished spray per acre by aerial application.
- For fall applications apply after September 15th to December 31st. Apply Authority MTZ DF to emerged cover crops listed above with 2 or more leaves.
- Authority MTZ DF may be tank-mixed with other herbicides labeled for postemergence applications in cover crops listed above. Tank-mix a labeled herbicide such as Aim[®], 2,4-D, dicamba or dicamba + 2.4-D pre-mixtures for help in the control of emerged broadleaf weeds.
- Follow all label use directions, surfactant recommendations, rotational guidelines and restrictions for Authority MTZ DF and any tank-mix partners and follow the specific guidelines of the most restrictive label.
- The following crop rotations must be followed. For all other crops, refer to the EPA registered label.
