ENVIRONMENTAL HAZARDS

Do not contaminate water sources by cleaning of equipment or disposal of wastewater.

USE INFORMATION

BEANOIL is a superior blend of special emulsifier-surfactants and highly refined soybean oil that is designed for use with a broad range of pesticides where an oil concentrate adjuvant is recommended. This product may be used at rates of 0.25 to 0.75% v/v with herbicides, insecticides, fungicides, fertilizers and micronutrients. The addition of this product to a spray tank improves pesticide applications by modifying wetting and contact activity of the spray, enhancing penetration and providing uniform deposition of spray deposit to the leaf surface. This product contains anti-foam to suppress foam development in the tank-mix combinations.

DIRECTIONS FOR USE

This product may be used with products registered for: Agricultural, Industrial, Forestry Site Prep, Municipal, Non-cropland, Utility and Roadside Rights-of-way, Ornamentals, Turf and other uses. The addition of an adjuvant to some pesticides or tank-mix combinations may cause phytotoxicity to foliage or fruit of susceptible crops.

Refer to the label of the tank-mixture partner(s) for any additional use instructions or restrictions. Always follow the most restrictive label.

This product may be applied by high or low volume ground, aerial or any type of equipment recommended by pesticide labels.

Not for aquatic use.

MIXING: To prepare sprays containing this product, fill the spray tank half full with water, add the proper amount of pesticide, fertilizer or micronutrient as directed by its label and then add this product. Maintain agitation during the entire process. Continue agitation before and during each application to ensure a uniform spray.

Note: Care should be exercised when spray containing this product, is applied to new crop varieties or highly inbred crop lines not previously sprayed with this product. It is recommended that a small test area be treated before spraying large areas. Use care when pesticides are more active, such as during periods of hot or humid conditions.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PRODUCT STORAGE: Store in a cool, dry, well-ventilated area.

Avoid high temperatures. Store above freezing.

PRODUCT DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.
