

Aquicare®

Turf & Soil Wetting Agent

CONTAINS NON-PLANT FOOD INGREDIENT:

Active Ingredients:

Blend of Alkoxylated Alcohols.....100.0%

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes eye irritation.

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

(If you do not understand the label, find someone to explain it to you in detail.)

PRECAUTIONARY STATEMENTS

Wash hands thoroughly after handling. Store in original container only and keep sealed. Store in closed storage areas. Wastes resulting from the use of this product may be disposed of through on-site spray application or at an approved waste disposal facility. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. Contact your state and local ACRC recycler or visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

FIRST AID

IF IN EYES: Rinse cautiously with water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical attention.

For Emergency, Spill, Leak, Fire, Exposure, or Accident, Call: CHEMTREC 1-800-424-9300

GENERAL INFORMATION

Aquicare® is a safe, non-phytotoxic wetting agent specially formulated to prevent and control localized dry spot conditions and water repellent soils. This unique formulation reduces water surface tension, which optimizes the balance of precipitation and irrigation water with air in the soil to promote healthy plant growth. It is specifically designed to resist excessive water retention at the soil surface, but maintain optimum moisture levels in the root zone to provide a firm, healthy playing surface.

Aquicare® is effective for use on all golf courses, sod farms, recreational, commercial and sports turfgrass areas to reduce watering requirements and maintain quality turf.

Information regarding the contents and levels of metals in this product is available on the internet at:

<http://www.aapfco.org/metals.htm>

DIRECTIONS FOR USE

READ ENTIRE LABEL BEFORE USING

Aquicare® can be mixed with most common pesticides and fertilizers. A jar test should be used to confirm compatibility. Although developed for non-phytotoxicity, a field test should be conducted to confirm plant safety. In addition, prior to use, always be sure that spray tank and equipment lines are thoroughly cleaned and free of any contaminants. Wetting agents can enhance the efficacy of other tank mix active ingredients and possibly release sediment or active ingredients remaining in spray tank or spray lines.

WINFIELD™

As a preventative treatment for localized dry spot, Aquicare® should be applied in the spring before localized dry spot appears. As a curative treatment for localized dry spot, Aquicare® should be applied when environmental conditions begin to impact turf health. Aquicare® does not need to be watered in immediately, however, for best results watering of treated areas is recommended after application to remove product from the leaf surface and promote infiltration into the soil.

Spray Application to Turf

Location	Fluid ounces per 1000 sq. ft.	Timing	Usage	Carrier Water
Northern Climates	2-3 fl oz	Monthly	Normal Conditions	2-3 gal per 1000 sq. ft.
	4-5 fl oz	Monthly	Curative or High Stress	
	10-12 fl oz	Quarterly	Seasonal Application	
Transition Zone	3-4 fl oz	Monthly	Normal Conditions	
	5-6 fl oz	Monthly	Curative or High Stress	
	10-12 fl oz	Quarterly	Seasonal Application	
Southern Climates	4-6 fl oz	Monthly	Normal Conditions	
	6-7 fl oz	Monthly	Curative or High Stress	
	12-14 fl oz	Quarterly	Seasonal Application	

*High Stress: Periods or expected periods of prolonged water stress conditions (drought) or periods of elevated high temperatures.

Injection Into Irrigation Systems

In northern climates, inject 64 fluid ounces per acre under normal conditions and 128 fluid ounces per acre under high stress conditions. In the transition zone and southern climates, inject 128 fluid ounce per acre under normal conditions and 200 fluid ounces per acre under high stress conditions. Supplemental treatment of tees and greens may be required due to the diluted rate of application common with irrigation injection systems.

MIXING WITH WATER

This product mixes readily with water. Mix spray solutions of this product as follows: Fill the mixing or spray tank with the required amount of water. Add the recommended amount of Aquicare® near the end of the filling process and mix well.

During mixing and application, foaming of the spray solution may occur but will slowly dissipate. To minimize foam, avoid the use of mechanical agitation, terminate by-pass and return lines at the bottom of the tank and, if needed, use anti-foam agent such as Fast Break®.

NOTICE OF WARRANTY

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
