For any requirements specific to your State or Tribe; consult the agency responsible for pesticide regulation. Do not apply this product in any way that will contact workers or other persons; either directly or through drift. Only protected handlers may be in the area during application.

DuPont™ Exirel® insect control must be used only in accordance with directions on this bulletin or in separately published DuPont labeling.

DuPont Exirel® Insect control is recommended for control of carrot weevil in root vegetables (crop group 1B, except sugar beet) and Florence fennel.

Apply Exirel® insect control at 13.5-20.5 fl oz/A as a foliar spray using properly calibrated ground spray equipment. Initial application should be made at first sign of adult weevil presence.

For best results use the highest labeled rate of Exirel® (20.5 fl oz/A). Under moderate to high pest pressure, an additional application of Exirel® may be needed to maintain weevil populations below damaging levels. Consult your state cooperative extension service, professional consultants or other qualified authorities to determine appropriate action threshold levels for this pest.

Thorough spray coverage of is essential to achieve best results.

Read and follow the protection of pollinators section of the federal label when using during bloom.

DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with uses not specified by the label or DuPont 2(ee) instructions.
