

CITRI-CHE[®] COPPER 5%

CHELATED MICRONUTRIENT FOR CORRECTION OF COPPER DEFICIENCY IN CROPS

GUARANTEED ANALYSIS

Sulfur (S)2.0%
2.0% Combined Sulfur (S)
Copper (Cu).....5.0%
5.0% Chelated Copper (Cu)

Derived from Copper Sulfate. Chelated with EDTA and Citric Acid.

STORE ABOVE 32°F

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes serious eye irritation. Causes skin irritation. Harmful if swallowed. May cause respiratory irritation.

PRECAUTIONARY STATEMENTS

Wash hands thoroughly after handling. Wear eye and face protection and protective gloves. Avoid breathing mist, spray or fumes. Use only outdoors in a well-ventilated area. Do not eat, drink or smoke when using this product. Store in a well-ventilated and secured place. Keep container tightly closed. Dispose of empty containers by triple rinsing and discard empty containers in a landfill in accordance with current local, state, and federal regulations.

FIRST AID

IF IN EYES: Rinse cautiously with water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor for treatment advice if you feel unwell.

IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical attention. Take off contaminated clothing and wash before reuse.

IF SWALLOWED: Immediately call a poison control center or doctor for treatment advice. Rinse mouth.

In case of medical emergency, call toll free 1-877-424-7452.

GENERAL INFORMATION

CITRI-CHE Copper 5% chelated micronutrient contains 5% of chelated copper in a form readily available to plants. It is recommended for use as an additive in liquid fertilizer and can also be used as a foliar spray. CITRI-CHE Copper 5% is compatible with herbicides, insecticides, and most agricultural chemicals that may be utilized in combination with liquid fertilizer. CITRI-CHE Copper 5% is most effective when placed in the root zone during planting or moved into the soil by irrigation, tillage, or rainfall. It is important that the copper deficiency be treated before visual symptoms appear to insure proper yields. Rates of application will vary depending upon the severity of the deficiency, climate, soil conditions, and method of application. Consult your state Agricultural Experiment Station or Extension Specialists for advice in selecting treatments from this label to best fit local condition.

DIRECTIONS FOR USE

Soil Application: CITRI-CHE COPPER 5% can be applied alone or in combination with liquid fertilizer for pre-plant, starter, or side-dress applications. For most effective treatment of row crops make soil applications in a band at planting time or as a side-dressing shortly after planting.

Foliar Application: CITRI-CHE COPPER 5% diluted with water according to label recommendations can be applied as a foliar spray. To ensure even distribution on the leaf surfaces and increase the effectiveness of foliar application a small amount of wetting agent or detergent may be added.

NOTE: Foliar Spray of CITRI-CHE COPPER 5% should not be considered a substitute for soil application but rather a supplement or temporary measure to correct copper deficiency in most crops.

This product is for use on all food and fiber crops. These are general recommendations. Consult your local agricultural professional or regional Winfield Plant Nutrition Specialist for specific recommendations.

SOIL APPLICATION

Deficiency Level	Rate Banded	Rate Broadcast
Mild	1-2 qt/acre	1-3 qt/acre
Moderate	2-3 qt/acre	3-5 qt/acre
Severe	3-4 qt/acre	5-8 qt/acre

FOLIAR APPLICATION

By ground, apply 1-2 pints per acre in a minimum of 20 gals. of water. By air, apply 1-2 pints per acre in a minimum of 5 gals. of water.

APPLICATION WITH IRRIGATION WATER

PIVOT, SPRINKLER, OVERHEAD AND SOLID SET IRRIGATION: Apply within 2 weeks of planting and before flowering using 1 to 4 quarts per acre or the dosage rates and timing recommended by your State Agricultural Experiment Station, Extension Specialists or Winfield Regional Plant Nutrition Specialist. This product may be mixed with most liquid fertilizers or pesticides before injection. Use a back-flow check valve to prevent material from back siphoning into water system.

MIXING INSTRUCTIONS

Add 1/3 – 1/2 of the liquid fertilizer mix to the tank. Add correct amount of CITRI-CHE COPPER 5%. Add remainder of fertilizer, then mix thoroughly with strong agitation. Other chemicals, if used, should be added after the fertilizer-micronutrient mix has been prepared.

If there are questions regarding compatibilities of other substances with CITRI-CHE Copper 5%, conduct a jar pilot test to determine the mixing characteristics of the different materials.

NOTE

A number of variables influence the rate of application necessary to control or correct a specific deficiency. For best results follow good agronomic practices, soil test and, if necessary, use tissue analysis.
