GENERAL INFORMATION

USA 500 is a proprietary blend of macro and micronutrients. USA 500 is designed for use with starter fertilizers to protect and enhance the nutritional component of starter fertilizers. USA 500 is compatible with the majority of fertilizers used as row starters (eg. 10-34-0, 6-24-6, 9-18-9) and may be used in all agronomic crops.

APPLICATION RECOMMENDATIONS

USA 500 is intended to be blended directly with the row starter being used. Not all possible formulations of starters have been tested for compatibility. USA 500 is highly compatible, but always perform compatibility or jar test with the specific blend or formulation of starter being used, before mixing large quantities. If initial compatibility is good, pre-blending for storage should be acceptable. After pre-blending and extended storage, tank re-circulation is recommended before use.

USE RATE

48 ounces/acre

USA 500 should be blended with starter fertilizers.

BLENDING INSTRUCTIONS WITH FERTILIZERS

1. Fill tank at least 1/2 full of liquid fertilizer.
2. Add in calculated rate of USA 500, while filling fertilizer tank.
3. Finish filling tank with liquid fertilizer with agitation running.
4. If needed, add other micronutrients after the USA 500 + fertilizer mix has been prepared.
