For control of certain grasses and broadleaf weeds in alfalfa and sainfoin, asparagus, carrots, field corn, garbanzo beans, lentils and peas, potatoes, soybeans, spring and winter barley and winter wheat, sugarcane, sweet corn, and tomatoes

Also for use on established bermudagrass turf

**ACTIVE INGREDIENT:**
Metribuzin, 4-Amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-triazin-5(4H)-one ........................................ 75.0%

**OTHER INGREDIENTS:** ........................................ 25.0%

**TOTAL:** ........................................ 100.0%

STOP – READ THE LABEL BEFORE USE
KEEP OUT OF REACH OF CHILDREN

**CAUTION**

**FIRST AID**

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency medical treatment, contact the Rocky Mountain Poison Control Center at 1-866-673-6671.

Note to Physician: Treat patient symptomatically.

FOR CHEMICAL EMERGENCY: Spill, leak, fire, exposure, or accident, call CHEMTREC at 1-800-424-9300.
STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed. Store in original container and out of reach of children, preferably in a locked storage area.

Handle and open container in a manner as to prevent spillage. If the container is leaking or material spilled for any reason, clean up spill material into a pit. Refer to Precautionary Statement on label for hazards associated with the handling of this material. Do not walk through spills material. Dispose of pesticide as directed below.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

[Non-Rigid Container] Container Disposal: Nonrefillable container. Do not reuse or refill this container. Container must be sent to recycler. Complete empty bag into application equipment. For recycling if available, or dispose of empty bag in a sanitary landfill or by incineration; or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Mixing: When using METRICOR DF, make sure the sprayer is completely free of rust or corrosion which occurs from water storage. Examine strainers and screens to be sure the sprayer is clean from previously used pesticides. Any tank-mix containing METRICOR DF should be kept agitated and sprayed out immediately. Do not allow tank-mixes to stand for prolonged periods of time.

AERIAL DRIFT REDUCTION ADVISORY INFORMATION

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment-and-weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions. The following drift management requirements must be followed to avoid off-target drift movement from aerial applications to agricultural field crops. These requirements do not apply to forestry applications, public health uses or to applications using dry formulations.

1. The distance of the outer most nozzles on the boom must not exceed 3/4 the length of the wingspan or rotor.

2. Nozzles must always point backwards parallel with the air stream and never be pointed downwards more than 45 degrees.

3. Where there are more stringent regulations, they must be observed.

4. The applicator should be familiar with and take into account the information covered in the Aerial Drift Reduction Advisory Information.
METRICOR DF herbicide is labeled for use in alfalfa and safflower in the following areas:

1. Alfalfa and safflower (including mixed stands of grasses) (all areas except California).
2. Alfalfa and safflower (including mixed stands of grasses) (California only).
3. BROAD-BASED SURFACE APPLICATION OF METRICOR DF: For use on mixed stands of alfalfa and grasses. Rates of 1/2 to 1 lb of METRICOR DF per acre will produce partial reduction of forage grass stands. These rates may be used to reduce forage grass stands to prevent crowding out of alfalfa. Higher rates will severely reduce forage grass stands.

METRICOR DF should not be used on sand soils. In areas West of the Rocky Mountains, avoid using METRICOR DF on soils with calcareous surface area, high levels of lime or sodium, or a pH greater than 8.2.

In Oregon and Washington, do not apply more than 2/3 lb of METRICOR DF per acre.

In California, select the proper dosage according to weeds known to be present in field to be treated. On loamy sand soils in Oregon and Washington, do not apply more than 2/3 lb of METRICOR DF per acre.

FOR USE ON MIXED STANDS OF ALFALFA AND GRASSES

Rate of 2/3 to 1 lb of METRICOR DF per acre will produce partial reduction of forage grass stands. These rates may be used to reduce forage grass stands to prevent crowding out of alfalfa. Higher rates will severely reduce forage grass stands.

METRICOR DF should not be used on sand soils. In areas West of the Rocky Mountains, avoid using METRICOR DF on soils with calcareous surface area, high levels of lime or sodium, or a pH greater than 8.2.
WEEDS CONTROLED

1/2 to 2/3 Lb METRICOR DF/Acre

Chickweed, Common
(Stellaria media)

Lambquarters
(Chenopodium album)

Non-Dormant, Non-Winter Hardy Varieties
(Arizona Only)

Applications
METRICOR DF may be used as a broadcast surface application to established crops of non-dormant alfalfa varieties for pre- and post-emergence broadcast application of certain winter annual weeds following either a fall or winter sheep grazing/green-chop harvest.

WEEDS CONTROLED

Grasses
Kochia
(Chenopodium album)

BROADLEAVES

Lambquarters
(Chenopodium album)

Non-Dormant, Non-Winter Hardy Varieties
(Arizona Only)

Applications
METRICOR DF may be used as a broadcast surface application to established crops of non-dormant alfalfa varieties for pre- and post-emergence broadcast application of certain winter annual weeds following either a fall or winter sheep grazing/green-chop harvest.

WEEDS CONTROLED

Grasses
Kochia
(Chenopodium album)

Broadleaves
Dandelion
(Taraxacum officinale)

APPLICATIONS

METRICOR DF may be used in a broadcast surface treatment to establish crops of non-dormant alfalfa varieties for pre- and post-emergence broadcast application of certain winter annual weeds following either a fall or winter sheep grazing/green-chop harvest.

WEEDS CONTROLED

For information on Commercial Impregnation and application of METRICOR DF on dry bulk fertilizer, refer to the appropriate section of this label.

For information on Commercial Impregnation and application of METRICOR DF on dry bulk fertilizer, refer to the appropriate section of this label.

For use on mixed stands of alfalfa and grasses: Rates of 2 to 3 lb of METRICOR DF per acre will provide partial reduction of forage grass stands. These rates may be used to reduce forage grass stands to prevent crowding out of alfalfa. Do not apply more than 14 days after harvest unless application is made post-harvest on uncut out of alfalfa. Higher rates will severely reduce forage grass stands. Do not apply with aerial spray equipment when wind speed is greater than 10 mph. Do not use on sand soil.

Apply specified dosage by aerial or ground spray equipment in 7 to 40 gallons of water per acre. Treat established alfalfa crops as directed on this label for application during dormancy. Apply only when alfalfa foliage is dry or crop injury may occur. When using this application method, do not harvest or graze treated alfalfa for 60 days after application.

METRICOR DF may be applied after dormancy has broken, but prior to three inches of new alfalfa shoot growth, only when incorporated on dry fertilizer. In Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Nebraska, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas and Wisconsin. Apply at a rate of 1 to 1-1/3 lb per acre as directed on this label for application during dormancy. Apply only when alfalfa foliage is dry or crop injury may occur. When using this application method, do not harvest or graze treated alfalfa for 60 days after application.

METRICOR DF may be used as a broadcast surface treatment to establish crops of non-dormant alfalfa varieties for pre- and post-emergence broadcast application of certain winter annual weeds following either a fall or winter sheep grazing/green-chop harvest.

WEEDS CONTROLED

1/2 to 2/3 Lb METRICOR DF/Acre

Chickweed, Common
(Stellaria media)

Lambquarters
(Chenopodium album)

NON-DORMANT, NON-WINTER HARDY VARIETIES
(ARIZONA ONLY)

Applications
METRICOR DF may be used as a broadcast surface application to establish crops of non-dormant alfalfa varieties for pre- and post-emergence broadcast application of certain winter annual weeds following either a fall or winter sheep grazing/green-chop harvest.

WEEDS CONTROLED

For information on Commercial Impregnation and application of METRICOR DF on dry bulk fertilizer, refer to the appropriate section of this label.

For information on Commercial Impregnation and application of METRICOR DF on dry bulk fertilizer, refer to the appropriate section of this label.
BURNDOWN WEED CONTROL - FIELD CORN

METRICOR DF can be used as part of a herbicide program for burndown of emerging vegetation prior to crop emergence in conservation tillage systems. METRICOR DF may be tank-mixed with 2,4-D low volatile ester (LVE), Gramoxone Inteon, or Roundup/Roundup Ultra/Touchdown for control of emerged weeds prior to field corn emergence. METRICOR DF burndown tank-mixes can be applied before planting or prior to crop emergence in the following areas:

Field Corn: Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, Ohio, South Dakota, and Wisconsin.

Application: METRICOR DF may be applied up to 30 days prior to planting or pre-emergence. Apply only by ground equipment when METRICOR DF is used for burndown of existing vegetation in conservation tillage systems. METRICOR DF and tank-mix partner burndown rates are listed in the following three tables.

METRICOR DF BURNDOWN RATES - FIELD CORN

<table>
<thead>
<tr>
<th>CROPS</th>
<th>APPLICATION TIMING</th>
<th>METRICOR DF RATE (GA)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field corn</td>
<td>Iowa Minnesota Ohio Indiana Kentucky Wisconsin Michigan</td>
<td>Preplant (0 to 30 days)</td>
</tr>
<tr>
<td>Field corn</td>
<td>Illinois</td>
<td>Preplant (0 to 30 days)</td>
</tr>
</tbody>
</table>

SPECIAL PRECAUTIONS: Do not apply these treatments after crop emergence. Obtain all precautions and limitations on the labeling of all products used in tank-mixes. Refer to the “Use Information” section of this label for additional information, precautions, and limitations.

Field Corn:
1. Do not apply on very hot days or excessive crop injury will result.
2. Do not apply METRICOR DF within 3 days of any other chemical unless specified on this label.
3. Do not apply METRICOR DF within 3 days after periods of cool, wet or cloudy weather or crop injury will occur.
4. Do not apply METRICOR DF within 3 days after periods of cool, wet or cloudy weather or crop injury will occur.
5. Do not apply METRICOR DF within 3 days after periods of cool, wet or cloudy weather or crop injury will occur.
6. Do not apply METRICOR DF within 3 days after periods of cool, wet or cloudy weather or crop injury will occur.

FEEDING RESTRICTIONS: Corn treated with METRICOR DF may be harvested for silage or grain 60 days after treatment. Do not feed hay, forage, fodder or grain 2,4-D, Select, or Fusion treated vegetation. Follow the most restrictive preharvest interval of all products used in a tank-mix.

METRICOR DF PLUS TANK-MIX PARTNER BURNDOWN RATES - FIELD CORN

<table>
<thead>
<tr>
<th>PRODUCT</th>
<th>RATE</th>
<th>DIRECTIONS AND REMARKS</th>
</tr>
</thead>
<tbody>
<tr>
<td>METRICOR DF + 2,4-D LVE</td>
<td>1/4 to 1 lb ai/A</td>
<td>Apply at least 7 days preplant or at least 3 days after planting but before corn emergence.</td>
</tr>
<tr>
<td>METRICOR DF + Gramoxone Inteon</td>
<td>2 to 5-1/3 oz/A*</td>
<td>Must be applied prior to crop emergence. See Gramoxone Inteon label for amount to use in relation to weed height. Apply in 20 to 60 gallons of water per acre. Include either nonionic surfactant at 1 quart per 100 gallons (0.25% v/v) or crop oil concentrate at 1 gallon per 100 gallons (1% v/v) of spray solution.</td>
</tr>
<tr>
<td>METRICOR DF + Roundup/ Roundup Ultra or Touchdown</td>
<td>12 to 24 fl oz/A</td>
<td>Include either nonionic surfactant or crop oil concentrate in this tank mix.</td>
</tr>
<tr>
<td>METRICOR DF + Roundup/ Roundup Ultra or Touchdown</td>
<td>8 to 16 fl oz/A</td>
<td>Must be applied prior to crop emergence. Use the higher rates as weeds approach the maximum weed height listed in the “Weeds Controlled” section below. Apply in 10 to 20 gallons of water per acre. With Roundup and Touchdown, include nonionic surfactant at 1 quart per 100 gallons (0.5% v/v) or ammonium sulfate (spray grade) at 17 pounds per 100 gallons of spray solution. With Roundup Ultra, include ammonium sulfamate (spray grade) at 17 pounds per 100 gallons of spray solution. Any glyphosate formulation registered and labeled for use in field corn may be tank-mixed with METRICOR DF.</td>
</tr>
</tbody>
</table>

**If applied to field corn grown in Illinois, Indiana, Kentucky, Michigan, Minnesota, Ohio and Wisconsin, refer to Table 1 for correct METRICOR DF rate based on application timing.**

CARROTS

Special Conditions of Sale Provision for Use on Carrots: The following directions for use were developed under the direction of 4-J coordination group based on studies. As such, field testing was done independently from the testing program of United Phosphorus, Inc. Buyer is advised that United Phosphorus, Inc. makes no assurances regarding satisfaction with the product and to the extent consistent with applicable law all risks of crop injury or product performance are assumed by the Buyer.

Apply METRICOR DF herbicide with ground equipment as specified below under “Applications.” For effective control of broadleaf weeds with postemergence applications, apply METRICOR DF before weeds are 1 inch in height or diameter. Thorough coverage spray is essential for adequate weed control.

Do not use air blast or other high pressure spray equipment to make postemergence applications of METRICOR DF. Refer to the appropriate section of this label for additional information regarding spray equipment, dilution rates, mixing, sprayer cleanup, restrictions, container disposal and cautions.

Refer to “Mixing” under the “Use Information” section in the front of this label.

For specific application information see “Use Information” and “Application” sections at the front of this label.

WEEDS CONTROLLED: METRICOR DF applied to carrots according to directions will effectively control:

**Carpelweed**

(Bidens frondosa)

**Galinsoga**

Butcher + atrazine (Premix) +

Clarity

Laddok 3-12

Markman

Pursuit*

Resource

Scorpon III

Sough

* Use only on Pursuit resistant/tolerant corn hybrid (MIR® Corn).

**APPLICATION:** METRICOR DF may be applied to carrots for crop emergence only until just prior to tasselling. Broadcast applications may be made with ground or aerial equipment. For optimum weed control, apply treatments when weeds are small and actively growing, before reaching the maximum heights listed in the Weeds Controlled table.

**POSTEMERGENCE APPLICATION**

Ground Application: Adjunct nozzle height above corn weed canopy to ensure uniform spray coverage. Gallonage should be increased with increasing weed size and population density. For tank-mixes of METRICOR DF plus atrazine, Basagran, Laddok 3-12, Butcher, Butchi + atrazine, Pursuit, Resource, Tough, or 2,4-D atrazine formulations, use flat fan nozzles spaced no more than 30 inches apart. Best results are achieved using a minimum spray volume of 10 gallons per acre and spray pressure from 20 to 40 psi.

For METRICOR DF tank-mixes with Barned, Clarity, Markman, or 2-4-D low volatile ester formulations, use drift-reducing nozzles which are specifically designed to produce coarse sprays and reduce the amount of driftable fines. Additional measures which will help avoid potential drift to sensitive crops and plants include using a minimum spray volume of 20 gallons per acre and keeping spray pressures at or below 20 psi unless otherwise specified by the nozzle manufacturer. For further recommendations and additional cautions and recommendations, consult the tank-mix partner’s label.

**Aerial Application:** Apply in a minimum spray volume of 3 gallons per acre. For optimum spray coverage and distribution, use a minimum of 5 gallons per acre and a maximum pressure of 40 psi. Use a boom and nozzle configuration which will provide a uniform deposition pattern and coverage with low drift potential. Avoid overlaps to prevent potential crop injury. Do not apply near sensitive crops or sensitive plants growing near the treated area. Do not apply when wind speed is greater than 10 mph or when winds are moving toward sensitive crops or plants. To avoid drift hazards, applicator must follow the most restrictive labeling of the tank-mix used in a tank-mix. Refer to the appropriate tank-mix partner’s label for further precautions and recommendations.

**POST DIRECTED APPLICATION**

METRICOR DF in tank-mix combinations with Barned, 2-4-D, Butcher or Scorpon III may be applied post directed to field corn. Use drop nozzles and appropriate spacing to direct spray below the corn whorl and upper leaves. The top of the target weed canopy must be sufficiently below the whorl and upper leaves of the crop to permit proper spray application and provide adequate spray coverage. The height differential required between the crop and weed canopy will depend on the specific weed species and the extent of crop emergence. For further precautions and additional recommendations, refer to the appropriate tank-mix partner’s label.

**ADJUVANTS**

The adjutant types listed below may be utilized with certain METRICOR DF tank-mix combinations. Consult the tank-mix partner’s recommendations section for the appropriate adjutant and rate. Use of non-recommended adjuvants or rates may result in severe leaf burn, crop stunting, and/or stand reduction. Use only adjuvants which are exempt from tolerance requirements under 40 CFR 180 and 185.

**UAN** (urea ammonium nitrate) is commonly referred to as 28, 30, or 32-0-0.

**Ammonium sulfate** (spray grade) may be used as an alternative to UAN with certain tank-mix combinations.

Nonionic surfactants should contain at least 80% active ingredient.

**DO NOT USE:** crop oil concentrate (COC) or any adjuvant containing vegetable or petroleum oils with any METRICOR DF tank-mixes as severe leaf burn, crop stunting, and/or stand reduction may occur.

5
Weeds controlled. METRICOR DF in tank-mixtures with the above herbicides will provide burndown control of the weeds listed below.

**RESIDUAL WEED CONTROL**

METRICOR DF burndown programs can be used as part of a full season weed control program when 1) applied as a tank-mix with residual herbicides, or 2) followed with a postemergence weed control program, which is registered for use on the crop. For residual control, METRICOR DF burndown programs may include tank-mixes with the following herbicides or combinations of herbicides:

**TANK-MIX COMBINATIONS**

The METRICOR DF tank-mixtures listed below can be utilized for control of certain annual broadleaf weeds.

**RESILIENT WEED CONTROL**

METRICOR DF burndown programs may be used as part of a full season weed control program when 1) applied as a tank-mix with residual herbicides, or 2) followed with a postemergence weed control program, which is registered for use on the crop. For residual control, METRICOR DF burndown programs may include tank-mixes with the following herbicides or combinations of herbicides:

Field Corn

**PRAYER CLEANUP**

Refer to each tank-mix partner’s label and the Sprayer Cleanup section of the METRICOR DF label for specific instructions on cleaning spray equipment. Special attention should be given to the required cleanup procedures for 2,4-D, DO NOT USE ADJUVANTS. See the Banvel label for use rates and restrictions. If growing conditions are dry and plants are stressed, addition of a nonionic surfactant (1 qt/100 gal of spray solution) may improve weed control. For crops grown on coarse textured soils, apply Banvel or Clarity at 0.5 pt/A, regardless of application method. Application may cause injury to nearby sensitive crops or plants. Application may result in temporary leaning of corn plants. Delay cultivation until plants return to normal growth patterns to avoid stalk breakage.

**FEEDING RESTRICTIONS**

Field corn treated with METRICOR DF may be grazed or harvested for silage or grain 60 days after treatment. Follow the most restrictive preharvest interval on the labels of the products used in the tank-mixtures.
These tank mixtures with METRICOR DF will control the following annual weeds up to the maximum weed heights listed:

### METRICOR DF POSTEMERGENCE BROADCAST DIRECTIONS

<table>
<thead>
<tr>
<th>PRODUCT</th>
<th>RATE</th>
<th>DIRECTIONS AND REMARKS*</th>
</tr>
</thead>
<tbody>
<tr>
<td>METRICOR DF + Banvel + atrazine (Premix)</td>
<td>1 to 1.5 pt/A and 1-1/2 to 2 pt/A</td>
<td>Apply as a broadcast spray during the interval from corn emergence until corn is 12 inches tall and 6 to 8 weeks after application. DO NOT APPLY ADJUVANTS. Temporary corn leaf burn may occur and is similar to that observed from liquid fertilizer. Recovery is generally rapid with no lasting effect. To reduce potential for crop damage, application should be made to dry corn foliage when weather conditions are not extreme.</td>
</tr>
<tr>
<td>METRICOR DF + Markman</td>
<td>2 oz/A and 1-1/2 to 2 pt/A</td>
<td>Apply as a broadcast spray during the interval from corn emergence through the five-leaf stage or when corn is 8 inches tall, whichever occurs first. DO NOT USE ADJUVANTS. Application may cause injury to nearby sensitive crops or plants. Application may result in temporary leaning of corn plants. Delay cultivation until plants return to normal growth patterns to avoid stalk breakage. Markman contains atrazine, and is a restricted use product. Follow all state and federal label recommendations and restrictions pertaining to atrazine.</td>
</tr>
<tr>
<td>METRICOR DF + Pursuit</td>
<td>2 oz/A and 2 to 4 oz/A</td>
<td>Use only on designated IMI-Corn hybrids (which are resistant or tolerant to Pursuit). The 4 oz rate of Pursuit if grasses are present or broadleaf weeds are near the maximum heights shown. Apply in combination with a nonionic surfactant (1 pt/100 gal of spray solution) and UAN (1 to 2 pt/L).</td>
</tr>
<tr>
<td>METRICOR DF + Resource</td>
<td>3 oz/A and 4 to 6 oz/A</td>
<td>Apply as a broadcast spray to field corn from 2-leaf through 10-leaf (visible leaf collars) stage. Adjuvants such as nonionic surfactant (0.25% v/v), UAN (1 to 2 qt/A) or ammonium sulfate (2.5 lbs/A) may increase weed control. For corn grown on coarse textured soils, apply Banvel at 0.5 pt/A, regardless of application method. Application may result in temporary leaning of corn plants. Delay cultivation until plants return to normal growth patterns to avoid stalk breakage.</td>
</tr>
</tbody>
</table>

### SPECIAL PRECAUTIONS

Restrictive application methods of all products used. Applications may be made by either ground or aerial equipment. For tank-mixes, follow the most restrictive Pre-plant or Pre-emergence application rates on the product labels.

### APPLICATION DIRECTIONS

Apply specified dosage in a single pre-emergence application using 10 to 40 gallons of water per acre with ground spray equipment. Apply before or after planting but before crop emergence. Through incorporation, either by rainfall or by mechanical means, is essential for weed suppression. Under dry conditions, incorporate METRICOR DF into the top 1 to 2 inches of soil with spike hammers, or similar shallow incorporation equipment, then cross-hoe to ensure uniform soil incorporation. Where soil surface is moist at the time of application and rain follows before weed emergence, a broadcast application should provide adequate weed suppression. Use on coarse textured soils, sandy soils or any soil with less than 1.5% organic matter will likely cause crop injury.

### SPECIAL PRECAUTIONS

- Crop injury may result if crops are under stress conditions caused by cold weather, poor soil fertility, disease or insect damage.
- Crop injury may result if application is followed by heavy rain. Avoid application of more than 1/2 inch of irrigation within one month after application of METRICOR DF, or crop injury may occur.
- Do not use on clay knobs or poorly covered subsoil.
- Do not apply pre-emergence on shallow seedings less than 2 inches deep.
- Do not graze or feed treated vines to livestock within 40 days after application.
- Maintain continuous spray tank agitation to keep material in suspension. Avoid overlapping of spray swaths and shut off spray booms while turning, slowing or stopping, or crop injury will occur.

### WEEDS SUPPRESSED

- Common Chickweed**
- Common Lambsquarters
- Dog Fennel (Mayweed)
- Field Pennycress
- Herbicide Tolerance
- Shepherdspurse
- Wild Mustard

### GARBANZO BEANS (Chickpeas)

California, Idaho, Oregon, and Washington

### SPECIAL CONDITIONS OF SALE FOR USE ON GARBANZO BEANS (Chickpeas)

The following directions for use were developed under the direction of the R-4 government minor crops use program. As such the testing was done independently from the testing program of United Phosphorus, Inc. Buyer is advised that United Phosphorus, Inc. makes no assurances regarding satisfaction with the product and that to the extent consistent with applicable law all risks of crop injury or product performance are assumed by the Buyer.

METRICOR DF herbicide may be used as a pre-emergence application for the suppression of certain broadleaf weeds in lentil and peas.

### APPLICATION DIRECTIONS

- Apply specified dosage in a single pre-emergence application using 10 to 40 gallons of water per acre with ground spray equipment. Apply before or after planting but before crop emergence. Through incorporation, either by rainfall or by mechanical means, is essential for weed suppression.

### SPECIAL PRECAUTIONS (all applications)

- Do not apply more than 2/3 lb METRICOR DF per acre on lentils and spring peas. Do not apply more than 1/2 lb of METRICOR DF per acre. For suppression of dog fennel, use 1/3 lb METRICOR DF per acre. Apply specified dosage in 10 or more gallons of water per acre with ground spray equipment or 5 or more gallons of water per acre with aerial spray equipment. Do not exceed 40 psi with ground spray equipment. Apply as a broadcast spray when weeds are small (less than 2 inches in height or diameter) and before crop is 6 inches tall.

### PRE-EMERGENCE APPLICATION

- Make a single pre-emergence application of METRICOR DF at 1/4 to 1/2 lb per acre per crop year. Apply in 10 or more gallons of water per acre with ground spray equipment of 5 or more gallons of water per acre with aerial spray equipment. Apply METRICOR DF before or after planting. Thorough incorporation, either by rainfall or by mechanical means, is essential for weed suppression. Under dry conditions, incorporate METRICOR DF into the top 1 to 2 inches of soil with spike hammers, or similar shallow incorporation equipment, then cross-hoe to ensure uniform soil incorporation. Where soil surface is moist at the time of application and rain follows before weed emergence, a broadcast application should provide adequate weed suppression.

### POSTEMERGENCE APPLICATION

- Use on fine textured soils (high in clay or organic matter) and in fields with a history of high weed populations.

### WEEDS SUPPRESSED

- Common Chickweed**
- Common Lambsquarters
- Shepherdspurse**
- Herbicide Tolerance
- Pennycress
- Pineapple Weed
- Pineapple Pursuit

### GARBANZO BEANS (Chickpeas)

-Apply specified dosage in a single pre-emergence application using 10 to 40 gallons of water per acre with ground spray equipment. Apply before or after planting but before crop emergence. Through incorporation, either by rainfall or by mechanical means, is essential for weed suppression. Under dry conditions, incorporate METRICOR DF into the top 1 to 2 inches of soil with spike hammers, or similar shallow incorporation equipment, then cross-hoe to ensure uniform soil incorporation. Where soil surface is moist at the time of application and rain follows before weed emergence, a broadcast application should provide adequate weed suppression.

### SPECIAL PRECAUTIONS

- Crop injury may result if crops are under stress conditions caused by cold weather, poor soil fertility, disease or insect damage.

- Crop injury may result if application is followed by heavy rain. Avoid application of more than 1/2 inch of irrigation within one month after application of METRICOR DF, or crop injury may occur.

- Do not use on clay knobs or poorly covered subsoil.

- Do not apply pre-emergence on shallow seedings less than 2 inches deep.

- Do not graze or feed treated vines to livestock within 40 days after application.

- Maintain continuous spray tank agitation to keep material in suspension. Avoid overlapping of spray swaths and shut off spray booms while turning, slowing or stopping, or crop injury will occur.

### SPECIAL PRECAUTIONS

- Do not apply to lentils or peas.
- Do not use on clay soils or poorly covered subsoils.
- Do not apply on shallow seedings less than 2 inches deep (pre-emergence only).
- Do not apply within 50 days of harvest of peas, or within 75 days of harvest of lentils. Do not graze or feed treated vines to livestock within 40 days after application.

### POSTEMERGENCE APPLICATION

- Maintain continuous spray tank agitation to keep material in suspension. Avoid overlapping and shut off spray booms while turning, slowing or stopping, or crop injury will occur.

### NOTE

- This treatment may cause some chlorosis or minor necrosis. Because garbanzo bean varieties may vary in their susceptibility to METRICOR DF, determine crop tolerance prior to adoption of a field scale practice to prevent possible injury.
METRICOR DF herbicide may be used in ground, aircraft or specified chemigation equipment as a pre-emergence and/or postemergence application to potatoes. Early maturing smooth skinned white and all red skinned varieties may be injured with postemergence applications. The varieties Atlantic, Bethcip, Centennial, Chippewa and Shepody are sensitive to METRICOR DF. Avoid postemergence applications on these varieties. Pre-emergence applications on these varieties may cause crop injury under adverse conditions, on coarse soils, under high sun, poor soil pH, with higher rates per acre and with mechanical incorporation.

Ground Application: METRICOR DF may be used with ground spray equipment applied as a pre-emergence and/or postemergence application for control of the listed grass and broadleaf weeds in potatoes. Apply as a uniform broadcast spray at 20 or more gallons per acre.

Aerial Application: METRICOR DF may be applied in aerial spray equipment as a pre-emergence and/or postemergence application at 5 or more gallons per acre.

Chemigation: METRICOR DF may be applied pre-emergence and/or early postemergence to potatoes using center pivot, fixed and lateral row systems. Apply specified dosage in 1/4 to 3/4 inch of water per acre (1/6 to 1/2 inch on an sandy soil) as a continuous injection in self-propelled systems or apply in the last 15 to 30 minutes of the set in other systems. Run all the METRICOR DF has been flushed from the lines before shutting down the system.

WEEDS CONTROLLED

METRICOR DF applied to potatoes according to directions, will provide economic control of the following weeds. For optimal control, applications should be made before weeds are 1 inch tall. (See NOTE)

Broadleaf

Carpenterweed, common 1
Cocklebur, common 1
Jimmersoned 1
Kochia 1
Lambquarters, common 1

Grasses

Barnyardgrass 1
Crabgrass, large 1
Crabgrass, crab 1

Postemerger: Apply specified dosage as a broadcast spray over the tops of potato plants. Refer to Special Precautions (Potatoes.) Use rates of 1/3 to 1/2 lb/ acre for control of redroot pigweed and common lambsquarters only. Apply the 1/3 lb/acre rate for control of other weeds listed on this label.

Split Applications: This product may be applied once pre-emergence and once post-emergence as directed above. Refer to Special Precautions (Potatoes.) Do not exceed 1/3 lb/mt per application. Do not apply prior to planting.

Note: Where resistant weeds are present, METRICOR DF alone may not provide adequate control.

6. When applied in conjunction with soil-applied organic phosphate pesticides.

3. When applied in conjunction with soil-applied organic phosphate pesticides.

2. Due to the sensitivity of certain soybean varieties, METRICOR DF should not be used on Altona, AP 55, AP 71, Argro 6520, Burkan, Coker 106, Coker 156, Dazar, IL 2203, Spanish Maple Amber, NB 3656, NMS 1884, Paloma 350, Porto, Regal, Semmens, Temble-Vig 505, Temble-Vig 606, Tracy, Vansy, and Vinter 81. Consult your University, United States. Representative or your seed supply for information on the tolerance to METRICOR DF of newly released soybean varieties, prior to use of METRICOR DF.

3. When applied in conjuction with soil-applied organic phosphate pesticides.

2. Due to the sensitivity of certain soybean varieties, METRICOR DF should not be used on Altona, AP 55, AP 71, Argro 6520, Burkan, Coker 106, Coker 156, Dazar, IL 2203, Spanish Maple Amber, NB 3656, NMS 1884, Paloma 350, Porto, Regal, Semmens, Temble-Vig 505, Temble-Vig 606, Tracy, Vansy, and Vinter 81. Consult your University, United States. Representative or your seed supply for information on the tolerance to METRICOR DF of newly released soybean varieties, prior to use of METRICOR DF.

1. Potato vines left in rows as a result of harvest must be uniformly distributed over the soil surface prior to plowing and, if used as a pre-emergence application, must be thoroughly incorporated immediately following application.

2. Do not use METRICOR DF within 60 days of harvest. Should not be planted not be planted during the next growing season unless the following cultural practices 6. When applied to any soil with less than 1/2% organic matter.

5. Soil incorporation deeper than specified.

4. Over application or boom overlapping may result in stand loss and soil residues.

3. When applied in conjunction with soil-applied organic phosphate pesticides.

2. Due to the sensitivity of certain soybean varieties, METRICOR DF should not be used on Altona, AP 55, AP 71, Argro 6520, Burkan, Coker 106, Coker 156, Dazar, IL 2203, Spanish Maple Amber, NB 3656, NMS 1884, Paloma 350, Porto, Regal, Semmens, Temble-Vig 505, Temble-Vig 606, Tracy, Vansy, and Vinter 81. Consult your University, United States. Representative or your seed supply for information on the tolerance to METRICOR DF of newly released soybean varieties, prior to use of METRICOR DF.

1. Potato vines left in rows as a result of harvest must be uniformly distributed over the soil surface prior to plowing and, if used as a pre-emergence application, must be thoroughly incorporated immediately following application.

2. Do not use METRICOR DF within 60 days of harvest. Should not be planted not be planted during the next growing season unless the following cultural practices 6. When applied to any soil with less than 1/2% organic matter.

5. Soil incorporation deeper than specified.

4. Over application or boom overlapping may result in stand loss and soil residues.

3. When applied in conjunction with soil-applied organic phosphate pesticides.

2. Due to the sensitivity of certain soybean varieties, METRICOR DF should not be used on Altona, AP 55, AP 71, Argro 6520, Burkan, Coker 106, Coker 156, Dazar, IL 2203, Spanish Maple Amber, NB 3656, NMS 1884, Paloma 350, Porto, Regal, Semmens, Temble-Vig 505, Temble-Vig 606, Tracy, Vansy, and Vinter 81. Consult your University, United States. Representative or your seed supply for information on the tolerance to METRICOR DF of newly released soybean varieties, prior to use of METRICOR DF.

1. Potato vines left in rows as a result of harvest must be uniformly distributed over the soil surface prior to plowing and, if used as a pre-emergence application, must be thoroughly incorporated immediately following application.

2. Do not use METRICOR DF within 60 days of harvest. Should not be planted not be planted during the next growing season unless the following cultural practices 6. When applied to any soil with less than 1/2% organic matter.

5. Soil incorporation deeper than specified.

4. Over application or boom overlapping may result in stand loss and soil residues.

3. When applied in conjunction with soil-applied organic phosphate pesticides.

2. Due to the sensitivity of certain soybean varieties, METRICOR DF should not be used on Altona, AP 55, AP 71, Argro 6520, Burkan, Coker 106, Coker 156, Dazar, IL 2203, Spanish Maple Amber, NB 3656, NMS 1884, Paloma 350, Porto, Regal, Semmens, Temble-Vig 505, Temble-Vig 606, Tracy, Vansy, and Vinter 81. Consult your University, United States. Representative or your seed supply for information on the tolerance to METRICOR DF of newly released soybean varieties, prior to use of METRICOR DF.

1. Potato vines left in rows as a result of harvest must be uniformly distributed over the soil surface prior to plowing and, if used as a pre-emergence application, must be thoroughly incorporated immediately following application.
When a Split-Shot application of METRICOR DF with Prowl, Treflan, or Sonalan is used, the preplant incorporated tank-mix sections concerning the use of METRICOR DF in tank-mix combinations on soybeans. For directions on soil preparation, herbicide application, incorporation techniques, herbicide rates, weed species control, environmental hazards and planting of rotational crops. Refer to the Scepter label for additional cautions and precautions, directions, limitations, and information on environmental impact.

**METRICOR DF (Alone) Pre-emergence Application:**

METRICOR DF (Alone) Pre-emergence Application: The following rates of METRICOR DF may be applied pre-emergence to control annual grasses and broadleaf weeds. The application may be made during planting or as a separate operation after planting but before crop emergence. See the “USE INFORMATION” section in the front of this label.

**METRICOR DF Split-Shot Application**

A preplant incorporated application of METRICOR DF tank-mixed with either Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan and followed by a pre-emergence surface application of METRICOR DF alone after planting but prior to soybean emergence, will control more broadleaf and grass weeds in soybeans than when either herbicide is used alone. Use this lower rate of METRICOR DF in the preplant incorporated tank-mix on soils having a calcareous surface area or a pH of 7.5 or higher, and in those situations where soils in a field vary greatly in texture or organic matter content. Reduce this pre-emergence overlap rate of METRICOR DF by 1/6 lb/acre when using Split-Shot application on soils with over 4% organic matter and which have a calcareous surface area or a pH of 7.5 or higher.

**SPLIT-SHOT APPLICATION**

* Silty clay loam soils are transitional soils and may be classified as medium textured soils in some regions of the U.S. On coarse textured soils, do not use on sand soils with less than 1% organic matter, or on loamy sand or sandy loam soils with less than 0.5% organic matter. However, on coarse textured soils with a calcareous surface area or a pH of 7.5 or higher, do not use on sand soils with less than 2% organic matter, or on loamy sand or sandy loam soils with less than 1% organic matter. Use this lower rate of METRICOR DF in the preplant incorporated tank-mix on soils having a calcareous surface area or a pH of 7.5 or higher, and in those situations where soils in a field vary greatly in texture or organic matter content.
**METRICOR DF PLUS SOLANAL**

**METRICOR DF plus Solanum Overlay Application:** METRICOR DF may be applied as a pre-emergence overlay application following a preemergence incorporated treatment of Solanum 3 EC. Consult the Solanum label for specific directions on use, recommendations, restrictions and any additional weeds not specified on this label.

**METRICOR DF plus Solanun Tank-mix Application:** Incorporate the tank-mix into the top 2 to 3 inches of soil within 21 days before planting according to label directions for Solanum.

Apply METRICOR DF plus Solanum preplant if fumigation is used or when a period of dry weather after application is expected. If soybeans are planted on beds, apply and incorporate the tank-mix after bed formation.

Mixing: Refer to the “Use Information” section in the front of this label.

Application: Soybeans should be uniformly applied and thoroughly mixed into the soil within 2 days after application. For specific application information, refer to the “Application” section in the front of this label.

**GENERAL PRECAUTIONS (METRICOR DF plus Solanum):** For additional precautions, restrictions, limitations, incorporation, and sprayer cleanup information, refer to the appropriate sections of this label and the Solanum label.

For black nightshade control, refer to the Solanum label for specific rates and application instructions.

**METRICOR DF PLUS TREFLAN**

**METRICOR DF and Treflan Overlay Application:** METRICOR DF may be applied as a pre-emergence broadcast or band-overlap application following a preemergence incorporated treatment of Treflan. Consult the Treflan label for specific directions for use, recommendations, restrictions and any additional weeds not specified on this label.

**METRICOR DF plus Treflan Tank-mix Application:** A single application of a tank-mix combination of METRICOR DF and Treflan is recommended for use on soybeans in territory where both herbicides are needed at the same time. Follow Treflan label for specific use information, refer to the “Use Information” section in the front of this label and the Treflan label.

Mixing: Refer to the “Use Information” section in the front of this label.

Application: Apply METRICOR DF plus Treflan to the soil surface and incorporate in the same operation, if possible. Variable weed control may result from delayed incorporation if METRICOR DF plus Treflan are applied to a wet, warm soil surface or if the wind blows the materials beyond the treated area. This may result in reduced weed control. Do not apply Treflan or METRICOR DF plus Treflan immediately following other herbicide applications. Application of Treflan may be delayed up to 24 hours after application. Shallow incorporation with implements set to cut less than 2 inches deep may result in erratic weed control. Do not use spike or spring-tooth harrows alone for incorporation.

**Incorporation Equipment:**
- 1. Set PTO-driven equipment (tillers, cultivators, hoes) to cut 2 to 3 inches deep and space rotors to provide a clean trash and clods.
- 2. Set disc to cut 4 to 6 inches deep and operate twice in different directions at 4 to 6 miles per hour.
- 3. Set match bladder and other similar disk-type implements to cut 3 to 4 inches deep and operate twice in different directions at 4 to 6 miles an hour.

For Coarse and Medium Textured Soils Only:
- 1. Set rolling cultivator to cut 2 to 3 inches deep and operate twice at 6 to 8 miles per hour. Set bed conditions (Do-All) to cut 2 to 4 inches deep and operate at 4 to 6 miles per hour.
METRICOR DF plus Prowl Tank-mix Applications

**SOIL TEXTURE** | **METRICOR DF Lb/Acre** | **Prowl Pt/Acre**
--- | --- | ---
COARSE (Sand, loam, sandy loam) | 1/3 | 1
MEDIUM (Loam, silt loam, sandy clay, sandy clay loam) | 1/2 | 1-1/2 to 2
FINE (Silty clay, silty clay loam, clay, clay loam) | 2/3 to 3/5 | 2-1/2 to 2

Over 3% ORGANIC MATTER

**SOIL TEXTURE** | **METRICOR DF Lb/Acre** | **Prowl Pt/Acre**
--- | --- | ---
COARSE (Sand, loam) | 1/2 | 1-1/2 to 2
MEDIUM (Loam, silt loam, sandy clay, sandy clay loam) | 1/2 to 2/3 | 1-1/2 to 2
FINE (Silty clay, silty clay loam, clay, clay loam) | 2/3 to 5/6 | 2-1/2 to 2

Do not use on muck or peat soils.

**SPECIAL PRECAUTIONS (METRICOR DF plus Prowl)**: Soil incorporation deeper than specified will reduce weed control and can result in crop injury. For additional precautions, restrictions, limitations, and sprayer cleanup information, refer to the appropriate sections of this label and the Prowl label.

METRICOR DF plus LASSO Tank-mix Application

**PRE-EMERGENCE**

METRICOR DF may be used in a tank-mix combination with Lasso as a pre-emergence band or broadcast application to soybeans in accordance with the specified soil types and dosages specified.

For specific information regarding spray equipment, dilution rates, mixing, directions for use, methods of application, limitations and restrictions refer to the appropriate section of this label.

Refer to the Lasso label for pertinent recommendations, directions for use, restrictions and any additional weeds not specified on this label.

Do not use on muck soils.

**TANK MIX APPLICATIONS**

**SOIL TEXTURE** | **METRICOR DF plus Lasso Tank-mix Pre-emergence Application (Broadcast Rates)** | **Lasso Qt/Acre**
--- | --- | ---
COARSE (Sand, loam) | 1/3 | 1-1/2 to 2
MEDIUM (Loam, silt, clay, silt loam) | 1/2 | 1-1/2 to 2
FINE (Silty clay, clay loam) | 2/3 to 5/6 | 2-1/2 to 2

METRICOR DF PLUS LASSO

**SOIL TEXTURE** | **METRICOR DF Lb/Acre** | **Lasso Qt/Acre**
--- | --- | ---
COARSE (Sand, loam) | 1/3 | 1-1/2 to 2
MEDIUM (Loam, silt loam, sandy clay, sandy clay loam) | 1/2 | 1-1/2 to 2
FINE (Silty clay, clay loam) | 2/3 to 3/5 | 2-1/2 to 2

Do not use on coarse soils with less than 1% organic matter.

Do not use on mucky soils.

**SPECIAL PRECAUTIONS (METRICOR DF plus Lasso)**: For additional precautions, restrictions, limitations, and sprayer cleanup information, refer to the appropriate sections of this label and the Lasso label.

**TANK MIX APPLICATIONS**

**METRICOR DF plus Command 4EC Terminal Application (Broadcast Rates)**

**SOIL TEXTURE** | **METRICOR DF Lb/Acre** | **Command 4EC Pt/Acre**
--- | --- | ---
COARSE (Sandy loam) | 1/3 | 1-1/2 to 2
MEDIUM (Loam, silt, clay, silt loam) | 1/2 | 1-1/2 to 2
FINE (Silty clay, clay loam) | 2/3 to 5/6 | 2-1/2 to 2

Do not use on coarse soils with less than 1% organic matter.

Do not use on sandy loam soils. Do not use on loamy sand or sandy loam containing less than 1% organic matter. Where a range of rates is shown for medium and fine soils, use the higher rate if heavy weed infestations are anticipated.

Do not use on muck or peat soils.

**SPECIAL PRECAUTIONS (METRICOR DF plus Command 4EC)**: Soil incorporation deeper than specified will reduce weed control and can result in crop injury. For additional precautions, restrictions, limitations, and sprayer cleanup information, refer to the appropriate sections of the labels for METRICOR DF and Command 4EC.

METRICOR DF PLUS COMMAND 4EC

- Florida Beggarweed
- Galinsoga
- Galliwasp
- Goosegrass
- Greenbush</p>
METRICOR DF may be applied with Command 4EC and a grass herbicide (Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan) for control of certain broadleaf weeds and grasses in soybeans. The combination will provide improved control of grassy weeds such as weeds in soybeans. Refer to the product labels for Pursuit, Metolachlor, S-Metolachlor, Lasso, Prowl, Sonalan or Treflan for additional directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS PERSPECT PLUS A GRASS HERBICIDE

METRICOR DF may be tank-mixed with Pursuit Plus herbicide for broadcast pre-emergence or preplant incorporated application to soybeans for control of certain broadleaf weeds and grasses. Refer to Pursuit Plus herbicide label for additional directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS LINURON PLUS (Lasso, Metolachlor or S-Metolachlor)

METRICOR DF may be applied in combination with Linuron 50 DF or SL and Lasso 4 or Metolachlor or S-Metolachlor as a pre-emergence application for the control of certain weeds in soybeans. Refer to the Linuron, Lasso, Metolachlor or S-Metolachlor labels for specific directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS COMBINATION PLUS A GRASS HERBICIDE

METRICOR DF may be applied with Command 4EC and a grass herbicide (Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan) for control of certain broadleaf weeds and grasses in soybeans. The combination will provide improved control of grassy weeds such as weeds in soybeans. Refer to the product labels for Pursuit, Metolachlor, S-Metolachlor, Lasso, Prowl, Sonalan or Treflan for additional directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF is a broadcast herbicide and should be used for certain soil conditions. Do not use on loamy sand or sandy loam soils with less than 1% organic matter. The higher rate of METRICOR DF should be used for the control of sicklepod and hemp sesbania. Use the lower rate under moderate to heavy weed infestations.

Refer to the “Use Information” paragraph on this label for specific soil classification. On coarse textured soils (Lacking, Silt loam, Clay loam), use at 1/2 to 2/3 of the rate recommended for medium textured soils. On medium textured soils (Loam, Clay loam), use at 1/2 to 2/3 of the rate recommended for fine textured soils (sandy loam, sandy clay loam). On fine textured soils (Sandy loam, Clay loam), use at 1/2 to 2/3 of the rate recommended for medium textured soils.

Do not apply this tank-mix with aerial or irrigation equipment. Do not apply when weather conditions favor drift, or allow sprays to drift onto adjacent desirable plants. Do not use treated vines for feed or forage. Refer to appropriate sections of the Pursuit Plus herbicide label for restrictions on use area and rotational crops.

METRICOR DF PLUS SCEPTER PLUS A GRASS HERBICIDE

METRICOR DF may be applied with Scepter herbicide and a grass herbicide (Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan) for control of certain broadleaf weeds and grasses in soybeans. For specific application information, refer to the “Use Information” section in the front of this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF may be applied with a combination of Linuron 50 DF or SL and Lasso 4 or Metolachlor or S-Metolachlor as a pre-emergence application for the control of certain weeds in soybeans. Refer to the Linuron, Lasso, Metolachlor or S-Metolachlor labels for specific directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

MIXING AND APPLICATION:

METRICOR DF PLUS PERSPECT PLUS A GRASS HERBICIDE

METRICOR DF may be used alone or in combination with Pursuit, Metolachlor, Lasso, Prowl, Sonalan or Treflan for control of certain broadleaf grasses. For specific application information, refer to the “Use Information” section in the front of this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS COMBINATION PLUS A GRASS HERBICIDE

METRICOR DF may be applied with Command 4EC and a grass herbicide (Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan) for control of certain broadleaf weeds and grasses in soybeans. The combination will provide improved control of grassy weeds such as weeds in soybeans. Refer to the product labels for Pursuit, Metolachlor, S-Metolachlor, Lasso, Prowl, Sonalan or Treflan for additional directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS LUNIRON PLUS (Lasso, Metolachlor or S-Metolachlor)

METRICOR DF may be applied in combination with Linuron 50 DF or SL and Lasso 4 or Metolachlor or S-Metolachlor as a pre-emergence application for the control of certain weeds in soybeans. Refer to the Linuron, Lasso, Metolachlor or S-Metolachlor labels for specific directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS SCEPTER PLUS A GRASS HERBICIDE

METRICOR DF may be applied with Scepter herbicide and a grass herbicide (Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan) for control of certain broadleaf weeds and grasses in soybeans. For specific application information, refer to the “Use Information” section in the front of this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS LUNIRON PLUS (Lasso, Metolachlor or S-Metolachlor)

METRICOR DF may be applied in combination with Linuron 50 DF or SL and Lasso 4 or Metolachlor or S-Metolachlor as a pre-emergence application for the control of certain weeds in soybeans. Refer to the Linuron, Lasso, Metolachlor or S-Metolachlor labels for specific directions for use, recommendations, restrictions and any additional weeds not specified on this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

METRICOR DF PLUS SCEPTER PLUS A GRASS HERBICIDE

METRICOR DF may be applied with Scepter herbicide and a grass herbicide (Treflan, Lasso, Metolachlor, S-Metolachlor, Prowl or Sonalan) for control of certain broadleaf weeds and grasses in soybeans. For specific application information, refer to the “Use Information” section in the front of this label.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.

Mixing and Application: Refer to the “Use Information” section of this label for directions on mixing and application of METRICOR DF.
for use in coarse (light) soils

**SPECIAL PRECAUTIONS:** Do not apply on sand soils with less than 1% organic matter, or on sandy loam or loamy sand soils with less than 0.5% organic matter. For additional precautions, restrictions, limitations and sprayer cleanup information, refer to the appropriate sections of this label and the Treflan, Lasso, Metolachlor, S-Metolachlor, Surflan or Amiben labels.

**FEEDING RESTRICTIONS:** Do not apply tank-mixtures containing 2,4-D LVE if wind is blowing toward desired susceptible plants (i.e., cotton, tobacco, tomato, etc.) or when wind speeds exceed 6 miles per hour.

**BURNDOWN WEED CONTROL - SOYBEANS**

METRICOR DF can be used as part of a herbicide program for burndown of existing vegetation prior to crop emergence in conservation tillage systems. METRICOR DF may be tank-mixed with 2,4-D low volatile ester (LVE), Gramoxone Inteon, or Roundup/Roundup Ultra/Touchdown for control of emerged weeds prior to soybean emergence. METRICOR DF tank-mixes with 2,4-DB, Fusion, Poast Plus or Select may also be used in soybeans for control of emerged weeds prior to crop emergence. METRICOR DF burndown tank-mixes can be applied before planting or prior to crop emergence in the following areas.

**Soybeans:**

- All areas for all products except Fusion tank-mixes — see Fusion section of this label for allowed states.
- Application: METRICOR DF may be applied up to 30 days prior to planting or pre-emergence. Apply only by ground equipment when METRICOR DF is used for burndown of existing vegetation in conservation tillage systems. METRICOR DF and tank-mix partner burndown rates are listed in the following three tables.

### METRICOR DF BURNDOWN RATES - SOYBEANS

* Use 2,4-D LVE at 0.5 pound active ingredient per acre.
* Use a minimum Roundup/Roundup Ultra rate of 16 fl oz/A and a minimum Touchdown rate of 10.6 fl oz/A.
* Use METRICOR DF at 4 oz/A for optimum control.
* Suppression only.
* Does not control trichlor resistant biotypes.

---

### RESIDUAL WEED CONTROL

METRICOR DF burndown programs can be used as part of a full season weed control program when, 1) applied as a tank-mix with residual herbicides, or 2) followed with a postemergence weed control program, which is registered for use on the crop. For residual control, METRICOR DF burndown programs may include tank-mixes with the following herbicides or combination of herbicides:

- **Soybeans**
  - Clomax
  - Canopy
  - Command
  - Detail
  - DPX
  - Frontier

- **Ragweed**
  - Acho
t- **Cocklebur**
  - Dandelion, common
  - Horsetail/marestail
  - Kochia
  - Ladythorn
  - Lambquart, common
  - Lettuce, prickly
  - Malva, Venice
  - Morning glory spp.
  - Mustard sp.
  - Pennyroy, field
  - Pigweed, spp. (annual)
  - Pigweed, common
  - Pigweed, giant
  - Shepherdspurse
  - Sals, prickly
  - Smartweed, Pennsylvania
  - Sunflower, common
  - Thistle, Russian
  - Velvetchef
  - Watermelon spp.

---

### SOUTHERN AND SOUTHEASTERN STATES ONLY

**POSTEMERGENCE DIRECTED SPRAY APPLICATIONS**

METRICOR DF can be applied in postemergence directed spray to soybeans for control of certain weeds which escape preplant or pre-emergence herbicide applications and for control of additional classes of weeds that may occur after soybeans have emerged. Postemergence directed sprays of METRICOR DF can be applied to soybeans in addition to a pre-emergence or preplant application of METRICOR DF herbicide according to label directions.

**WEEDS CONTROLLED:** METRICOR DF, applied postemergence to soybeans as a directed spray according to directions on this label, will control the following at rates shown (broadcast basis) when grasses and common ragweed are 1 inch tall. For best results the spray must cover weed foliage with minimum or no contact with soybean foliage. Add a nonionic surfactant such as Ortho X-77 to the spray mixture to obtain better wetting of weed leaf surfaces. To determine the correct dosage of METRICOR DF for a band application see "Banded Application" under the "Use Information" section in the front of this label.

---

**METRICOR DF POSTEMERGENCE DIRECTED SPRAY APPLICATIONS**

**DROP**

- **Soybeans**
  - 1/3 to 2/3

**METRICOR DF Lb/Acre**

- 1/3 to 2/3

At the rate of 2/3 lb/Acre morningglory species, (bromus spp.) horseweed, (sals, prickly) Florida pusley, (acho
t) spotted spurge (Euphorbia maculata) and wild poinsettia (Euphorbia heterophylla) are suppressed when METRICOR DF is applied before these weeds are 3 inches tall. The 2/3 lb/Acre rate will suppress broadleaf sig
gnals (brachytrum phyllophylax) up to 1 inch tall.
METRICOR DF is a systemic herbicide used to control a variety of weeds in winter wheat, barley, and durum. It is applied post-emergence at various stages to control weeds and for fallow treatments. The weed control efficacy varies depending on the stage of application and the specific weed species. For detailed application recommendations and specific weed control information, refer to the full label and product material safety data sheet (MSDS) provided by the manufacturer. Always read and follow the label instructions carefully to ensure safe and effective use of METRICOR DF.
**WEEDS CONTROLLED IN IRRIGATED AND NON-IRRIGATED SUGARCANE**

**Broadleaves**
- Amaranthus, Spiny (Amaranthus spinosus)
- Euphorbia, Wild (Euphorbia spp.)
- Firas paintbrush (Emilia sonchifolia)
- Euphorbia antisyphilitica
- Euphorbia hirta
- Euphorbia glyptosiphon

**Grasses**
- Crabgrass (Digitaria spp.)
- Gulmargras (Panicum maximum)
- Chlorella radiata
- Combretum indicum
- Echinochloa crus-galli
- Digitaria sanguinalis
- Eleusine indica
- Panicum adspersum
- Brachiaria platyphylla

- Brachiaria platyphylla

**SPECIAL PRECAUTIONS: Do not use treated foliage for feed or forage.**

**SWEET CORN**

**PREPLANT AND PREEMERGENCE APPLICATIONS**

**Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Ohio, South Dakota and Wisconsin**

- **METRICOR DF** may be used for additional residual weed control of certain broadleaf weed species, when applied in combination with other broadleaf and/or grass herbicides as a tank mixture. All products used must be labeled for use on sweetcorn. The most restrictive restrictions and precautions of all the products used must be observed. Use only labeled rates and methods of applications.

**Tank Mixtures:** METRICOR DF can be tank-mixed with the products containing one or more of the following herbicides: 2,4-D, alachlor, atrazine, glyphosate, iminodibenzyl, metribuzin, paraquat, and pendimethalin.

**Special Exclusions:** Sequential applications of herbicides containing metribuzin (the active ingredient in METRICOR DF) are subject to a limitation of not more than 0.25 pounds a.i. of metribuzin (5-1/3 ounces of METRICOR DF per acre) of permethrin per corn application. Only one application of permethrin is allowed per corn application. There are no other specific restrictions on sequential applications due to the application of METRICOR DF.

**SPECIAL PRECAUTIONS:**
1. Do not apply more than a total of 5-1/3 ounces METRICOR DF (0.25 pounds metribuzin) per acre per growing season.
2. Do not apply preplant or preemergence on soils having a pH 7.0 or greater.
3. Corn seed should be planted a minimum of 1-1/2 inches deep.
4. METRICOR DF may only be used in hybrid seed production fields, if both inbred parents are known to be tolerant to METRICOR DF.
5. Reduced residual weed control may result when used on organic soils. For this reason, residual weed control is not claimed on organic soils.
6. Observe all precautions and limitations on labeling of all products used in tank mixes.

**Feeding Restrictions:** Corn, forage, and processing waste may be fed to livestock if harvested at least 60 days after the last application of METRICOR DF.

**SWEET CORN Sensitive Hybrid Sweetcorn Varieties:** Make applications only to hybrids that have established tolerance to the application methods used.

**Application Methods and Timing:** METRICOR DF can be applied preplant surface or preemergence as a broadcast or band broadcast application in water, fluid fertilizer, or incorporated on dry fertilizer. Ground or aerial equipment may be used. See DIRECTIONS FOR USE section of this label for directions.

**Application Rates:** Refer to the DIRECTIONS FOR USE section of this label for definitions of "Soil Texture Group" and other information that applies to all applications. Use the lowest rate of the rate range on soils with the lowest percent clay and organic matter content, and progressively higher rate for increased clay and organic matter content. The clay content is at least twice as important as organic matter when adjusting rates. Rates will vary based on local conditions.

**SOIL TEXTURE GROUP**

<table>
<thead>
<tr>
<th>SOIL ORGANIC MATTER CONTENT</th>
<th>1.5 to 2.9 %</th>
<th>3.0 % or More</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALL SAND SOILS</td>
<td>DO NOT USE</td>
<td>1.6 to 2.4 a/a</td>
</tr>
<tr>
<td>MEDIUM</td>
<td>3 to 3.3 a/a</td>
<td>3.2 to 3.7 a/a</td>
</tr>
<tr>
<td>FINE</td>
<td>3.6 to 4.0 a/a</td>
<td>3.6 to 4.4 a/a</td>
</tr>
</tbody>
</table>

For early preplant application more than 9 days before planting and fields with at least 30% crop residue on the soil surface at application, the application rate may be increased 1 a/a, but not to exceed 5-1/3 a/a. For band applications use proportional less per planted acre.
**CROP ROTATION RESTRICTIONS**

**WAITING PERIOD AFTER METRICOR DF HERBICIDE APPLICATION**

* Cov covered for soil building or erosion control may be planted any time, but do not graze or harvest for food or feed. Stand reductions may occur in some areas.
* Follow peas, lentils or soybeans. * Do not rotate rice after any application to a primary crop greater than 1.0 lb/acre of METCOR DF per season. Do not rotate any crop not listed on this label after application of METRICOR DF to sugarcane.

**DIRECTIONS FOR USE ON BENTGRASS GROWN FOR SEED AND FOR WEED CONTROL IN ESTABLISHED PERENNIAL GRASSES GROWN FOR SEED**

* Established grasses are those which have been harvested at least once or were planted one year or more prior to application.

**For Weed Control in Established Perennial Bentgrass Grown For Seed in Oregon West of the Cascade Mountains and in Crook, Deschutes, and Wasco Counties**

When used as directed below, METRICOR DF will reduce competition from seedlings of annual Bromus species, annual ryegrass, and annual bluegrass. METRICOR DF will control rattlefescue, henbit, hyaline speedwell, chickweed, mustards, and shepherd’s purse.

**APPLICATION INSTRUCTIONS**

</tr>
</tbody>
</table>

Apply METRICOR DF as a broadcast spray at least 15 gallons of spray solution per acre when volunteer grasses are in the 1 to 2 leaf growth stage following fall rainfall or irrigation and before active spring growth. Excessive crop injury and/or failure to control weeds may result if application is made after mid-February. Allow at least 120 days between application and harvest for seed.

**Crop Tolerance:** Crop tolerance is marginal and crop injury and yield reduction are possible. Make applications when the crop is not under stress to minimize crop injury. Use of adjuvants will reduce crop tolerance. Making the application after consecutive sunny days will reduce the potential for crop injury.

**Application Restrictions:**

1. Do not apply more than once per year.
2. Do not apply to a crop that is under stress (i.e., severe insect damage, cool to cold temperatures, disease, nutrient deficiency or deficient or excessive moisture).
3. Apply only to Colonial and Creeping Bentgrasses.
4. Apply only to established bentgrass that is at least one year old and has been harvested for seed at least once.
5. Do not mix with any other herbicides.

**Feeding Restrictions:** Do not use the crop or crop residues as feed or livestock bedding for at least 28 days following the last application.

**FOR WEED CONTROL IN ESTABLISHED PERENNIAL GRASSES GROWN FOR SEED IN OREGON WEST OF THE CASCADE MOUNTAINS AND IN CROOK, DESCHUTES, AND WASCO COUNTIES**

When used as directed below, METRICOR DF will reduce competition from volunteer seedlings of the indicated crop, annual Bromus species, annual ryegrass, and annual bluegrass. METRICOR DF will control rattlefescue, henbit, hyaline speedwell, chickweed, mustards, and shepherd’s purse. The addition of wetting agents containing crop oil may enhance control of the volunteer crop and grassy weeds. When adding wetting agents, follow the directions for use and recommended rates on the wetting agent label.

**METRICOR DF is compatible with most fertilizers, fungicides, and insecticides. METRICOR DF may be combined with other herbicides for enhanced weed control. To tank mix with another herbicide, refer to the “USE INFORMATION” section of the METRICOR DF label booklet and a knowledgeable authority or UP representative.”

Apply specified dosage as a broadcast spray at least 15 gallons of spray solution per acre when the volunteer grasses are in the 1 to 2 leaf stage following fall rainfall or irrigation but prior to active spring growth. Excessive crop injury and/or failure to control weeds may result if application is made after mid-February. Allow at least 120 days between application and harvest.

**Application Restrictions:**

1. Do not apply more than once per year on Perennial Ryegrass, Bluegrass, Fine Fescue or Orchardgrass. Multiple applications (3 maximum) may be made on Tall Fescue, but do not apply more than a total of 340 lb product per year.
2. Do not apply METRICOR DF through any type of irrigation system.
3. Crop and crop residues may be fed to livestock or used as bedding. If the seed crop is terminated and grazed or cut for forage, allow at least 28 days between application and use as animal feed.
4. Apply only to established grasses that are at least 1 year old and have been harvested at least once.
5. Do not apply to a crop that is under stress (i.e., severe insect damage, cold to cold temperatures, disease, nutrient deficiency, or deficient or extreme moisture).

**DIRECTIONS FOR USE ON BROADLEAF AND GRASS WEEDS IN ESTABLISHED BERMUDAGRASS TURF**

**PRESERVATIONS AND RESTRICTIONS**

Follow all appropriate precautions and restrictions on other portions of this label and on the full federal label.

For application ONLY by commercial applicators and only on established bermudagrass turf such as parks, athletic fields, golf course fairways and cemeteries which has a mowing height of one-half inch or greater.

- Not for use in commercial greenhouses, nurseries, on sod farms, or on grass grown for seed.
- For use on plants intended for aesthetic purposes or climatic modification and being grown on golf courses or lawns and grounds.

Do not apply or allow others to enter treated areas until crops have dried. Do not apply to dormant turf in the transitional bermudagrass growing zones which are or can be expected to be adversely affected by cold weather stress.

- Do not apply using low-pressure and high-volume hand-wand.
- Do not apply more than 2 lbs METRICOR DF (1.5 lbs per acre) in a single growing season. Do not apply more than once to dormant turf and twice to actively growing turf in a single growing season.
Avoid spray overlaps that will increase dosages above those specified.

Do not apply by air to turf.

Only apply to established bermudagrass turf with a mowing height of one-half inch or more. Do not apply to greens, tees, aprons, or other turf which is closely mowed.

Phytotoxicity may occur if applied within the root zone area of ornamentals, shrubs, or trees. Avoid application to these areas.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For best weed control, do not mow treated areas for at least 3 days after treatment. For best results, delay mowing until after rainfall or irrigation is necessary.

Do not use grass clippings for animal feed.

When applying METRICOR DF to turf which is actively growing, use the lower rate in areas where soil pH is greater than 7.5.

Do not allow sprays to drift onto adjacent desirable plants.

Observe all cautions and limitations on labeling of all products used in mixtures.

MIXING
First fill the spray tank 1/4 to 1/3 full with clean water, then add METRICOR DF at the specified rate. Mix thoroughly and add water to fill the spray tank. Agitation is necessary during mixing and spraying operations to ensure a uniform spray mixture.

Ensure that the sprayer is adequately calibrated before applying METRICOR DF. Avoid boom-overlaps that will increase dosages above those specified. Check the sprayer frequently during application to be sure it is working properly and delivering a uniform spray pattern.

Do not apply this product to turf through any type of irrigation system.

SPRAYER CLEANUP
Spray equipment must be thoroughly cleaned to remove remaining traces of herbicide that might injure other crops to be sprayed. Drain any remaining spray solution of METRICOR DF from the spray tank and dispose of according to label disposal instructions. Rinse the spray tank and refill with water, adding a heavy-duty detergent at the rate of one cup per 20 gallons of water. Recycle this mixture through the equipment for 5 minutes and spray out. Repeat this procedure twice. Fill the spray tank with clean water, recycle for 5 minutes, and spray out. Clean pump and nozzle screens thoroughly. Wash away spray mixture from the outside of spray tank, nozzles or spray rig. All rinse water must be disposed of in compliance with local, state, and Federal guidelines.

APPLICATION TO ESTABLISHED BERMUDAGRASS
Having a mowing height of one-half inch or more.

APPLICATION TO DORMANT TURF
Apply when weeds are present and actively growing. Apply 2/3 lb METRICOR DF in 40 gallons water/A as a broadcast spray before green-up of turf. Observe the “Precautions and Restrictions” when using this product.

BROADLEAF WEEDS (Except California)
Alkalai mallow (a. sida) Bedstraw Carolina geranium Carpetweed Common chickweed Corn speedwell
Herb
Hibiscus
Spotted bur clover
White clover
London rocket
Nettleleaf gooseneedl
Parsley-plant
Prostrate knaweed
Red deadnettle
Silversheath knaweed
Sheephead spurge
Small-flowered buttercup
Spotted spurge
Spur weed
Wild mustard

BROADLEAF WEEDS (California only)
Alkalai mallow (a. sida) Carpetweed Common chickweed Corn speedwell
Nettleleaf gooseneedl
Sheephead spurge
Wild mustard

APPLICATION TO ACTIVELY GROWING TURF
Apply 1/3 to 2/3 lb METRICOR DF in 40 gallons of water/A as a uniform broadcast spray. Apply only when turf is vigorously growing and not stressed. Repeat if necessary, but do not apply more often than every 7 days. Do not apply more than twice per season to actively growing. Applications may result in temporary discoloration, which turf soon outgrows.

Observe the “Precautions and Restrictions” when using this product.

WEEDS CONTROLLED (Actively Growing Turf)

Annual bluegrass (Poa annua) Goosegrass (Except California) Littleseed canarygrass Rabbitfootgrass

Other Weeds Controlled: METRICOR DF, when tank mixed with MSMA and applied to actively growing bermudagrass turf according to directions, will effectively control:

Bromegrass Common yellow woodrush Dallisgrass Nodgrass Sandbur

For control of these weeds, apply METRICOR DF as directed above and use as a tank mix with MSMA. Consult the MSMA label or contact your local turf extension specialist for additional directions, rates, weed species controlled, and precautions.

IMPORTANT INFORMATION
READ BEFORE USING PRODUCT

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY
NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product reflect the opinion of experts based on field use and tests and must be followed carefully. It is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffective-ness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of United Phosphorus, Inc. or Seller. Handling, storage, and use of the product by Buyer or User are beyond the control of United Phosphorus, Inc. and Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold United Phosphorus, Inc. and Seller harmless for any claims relating to such factors.

To the extent consistent with applicable law, United Phosphorus, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This war-
rense does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or United Phosphorus, Inc., and Buyer and User assume the risk of any such use. To the extent consistent with applicable law, UNITED PHOSPHORUS, INC. MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NON ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

To the extent consistent with applicable law, United Phosphorus, Inc. or Seller shall not be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF UNITED PHOSPHORUS, INC. AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT SHALL BE, AT THE ELECTION OF UNITED PHOSPHORUS, INC. OR SELLER, THE REPLACEMENT OF THE PRODUCT, OR COMPENSATION LIMITED TO DAMAGES NOT EXCEEDING THE FAIR MARKET PURCHASE PRICE, AND SHALL NOT INCLUDE INCIDENTAL OR CONSEQUENTIAL DAMAGES.

United Phosphorus, Inc. and Seller offer this product, and Buyer and User accept it, subject to the foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by the duly authorized representative of United Phosphorus, Inc.
