4.1 GENERAL FIRST AID MEASURES:

EYE CONTACT:	Immediately hold eye open and rinse slowly and gently with clean water. Remove contact lenses after 5 minutes, if present, then continue rinsing eye for 15 more minutes. Seek medical advice.
SKIN CONTACT:	Remove contaminated clothing. Clean skin thoroughly with soap and water for 15-20 minutes. Wash contaminated clothing before reuse. Seek medical advice.
INGESTION:	Call a poison control center, physician, or hospital immediately for treatment advice as appropriate. Identify the name of the product, the type and amount of exposure, and symptoms the patient is experiencing. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center, physician, or hospital. Do not give anything by mouth to an unconscious person.
INHALATION:	Remove to fresh air. If person is not breathing, call 911 or an ambulance, and then give artificial respiration if possible, preferably mouth-to-mouth if possible.

4.2 NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage.

4.3 MOST IMPORTANT SYMPTOMS/EFFECTS (ACUTE AND DELAYED):

Overexposure by contact may cause severe irritation to skin and eyes.

4.4 INDICATION OF NEED FOR IMMEDIATE MEDICAL ATTENTION:

If poisoning is suspected, or any symptoms are serious, immediately contact the poison control center, physician, or nearest hospital for instructions. Have the container or label with you when calling or going for treatment. Inform the contact of the name of the product, the type of exposure, and symptoms the patient is experiencing.
