

CORNBELT COMPATIBILITY AGENT

PRINCIPAL FUNCTIONING AGENTS*

Alkyl Aryl Polyethoxy Ethanol Phosphate and other Ethoxylated Derivatives	78%
Inert Ingredients	22%
	100%

*Ingredients are accepted for use under CFR 40, 180.1001 (c)

CAUTION

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS:

In case of contact with eyes, flush with water for at least 15 minutes. If irritation persists, contact physician. In case of skin contact, wash affected areas with water. Remove contaminated clothing and launder before reuse.

STORAGE & DISPOSAL:

Dispose of container in accordance with local, state and federal regulations.

In the event of a major spill, fire or other emergency, call CHEMTREC at (800) 424-9300.

GENERAL INFORMATION:

CORNBELT COMPATIBILITY AGENT is a conditioning adjuvant designed to improve the compatibility of liquid fertilizers with pesticides, as well as combinations of different herbicides when applied in a single spray solution.

DO NOT USE WITH SULFONYL UREAS.

DIRECTIONS FOR USE:

Add Cornbelt Compatibility Agent to the liquid fertilizer with good agitation prior to the addition of the pesticide. All mixtures of liquid fertilizer and pesticides should be tested for compatibility prior to field mixing. The amount of Cornbelt Compatibility Agent needed to achieve satisfactory stability will depend on the type of fertilizer and pesticide to be used. Fertilizer/pesticide mixtures should be applied soon after preparation. If mixture is allowed to stand, always agitate before using.

LIQUID NITROGEN FERTILIZERS: Use 1 to 3 pints of Cornbelt Compatibility Agent per 100 gallons of total liquid Nitrogen fertilizer/pesticide spray solution.

LIQUID MIXED FERTILIZERS: Use 2 to 3 pints of Cornbelt Compatibility Agent per 100 gallons of total liquid mixed fertilizer/pesticide spray solution.

HERBICIDE COMBINATIONS: For spray solutions of combinations of two or more herbicides, use 1 to 3 pints of Cornbelt Compatibility Agent per 100 gallons of spray mix.

COMPATIBILITY TEST PROCEDURE:

All mixtures of liquid fertilizer and pesticides should be tested for compatibility prior to field mixing. Mix the recommended ratio of herbicide to liquid fertilizer in a small jar, close tightly and shake. Allow the mixture to sit undisturbed for 5 minutes. If the mixture is a smooth slurry, it can usually be applied effectively. If the mixture contains lumps or an oily scum, repeat the test adding the recommended amount of Cornbelt Compatibility Agent.

CONDITIONS OF SALE AND WARRANTY:

The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of Van Diest Supply Co. or the Seller. All such risks shall be assumed by the Buyer. Van Diest Supply Co. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use, subject to the inherent risks referred to above. VAN DIEST SUPPLY CO. MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. IN NO CASE SHALL VAN DIEST SUPPLY CO. OR THE SELLER BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. Van Diest Supply Co. and the Seller offer this product, and the Buyer and the User accept it, subject to the foregoing Conditions of Sale and Warranty, which may be varied only by agreement in writing by a duly authorized representative of Van Diest Supply Co.
