<td>Grapes</td>
<td>Spotted Lanternfly (<em>Lycomia delicatula</em>)</td>
<td>6.4 fl oz/A (0.1 lb ai/A)</td>
</tr>
</tbody>
</table>

**REMARKS:**
- Apply in a minimum of 10 gallons of finished spray by air or in a minimum of 25 gallons of finished spray with ground equipment.
- Addition of an emulsifiable oil or nonionic surfactant at 0.25% v/v is allowed.
- Thorough coverage is essential to achieve control.

**RESTRICTIONS:**
- Do not apply more than 6.4 fl oz/A (0.10 lb ai/A) preharvest.
- Do not apply more than 12.8 fl oz/A of product (0.2 lb ai/A) per year.
- **Preharvest interval (PHI):** 30 days.
- If a pre-harvest application has been made, only 1 post-harvest application is allowed following harvest.
- Two post-harvest applications are allowed if no pre-harvest application has been made. The retreatment interval for post-harvest applications is 7 days.
Environmental Notices

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are visiting the treatment area.

Protect pollinating insects by following label directions intended to minimize drift and to reduce risk to these organisms.

The *Bombus affinis* (rusty patched bumble bee) is known to occur in areas where spotted lanternfly has been found in Virginia. The U.S. Fish and Wildlife Service (USFWS) has listed the rusty patched bumble bee as endangered under the Endangered Species Act. The product must be applied in accordance with USFWS guidelines and recommendations regarding potential zones for *B. affinis* populations. Applicators should consult the USFWS distribution map for *B. affinis* prior to applying Brigade 2EC for this use. The map is available at [https://www.fws.gov/midwest/Endangered/insects/rpbb/rpbbmap.html](https://www.fws.gov/midwest/Endangered/insects/rpbb/rpbbmap.html).
