

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF FLORIDA

Tenacity®

For Control of Goosegrass on Bermudagrass Athletic Fields and Golf Courses (Except Greens)

**EPA Reg. No. 100-1267
EPA SLN No. FL-140010**

Active Ingredient:

Mesotrione* 40.0%

Other Ingredients: 60.0%

Total: 100.0%

Contains 4 lb active ingredient mesotrione per gallon.

*CAS No. 104206-82-8

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

For control of goosegrass on bermudagrass athletic fields and golf courses (except greens), apply Tenacity (5 to 8 fl oz/A) + Princep® Liquid (15 to 25 fl oz/A) followed two weeks later by Tenacity (5 to 8 fl oz/A) + Princep® Liquid (15 to 25 fl oz/A) + Pennant Magnum® (20.8 fl oz/A). Application may be applied during spring, mid-summer or early fall. Higher rates are recommended on larger weeds or heavy infestation. Apply mixtures in 40 to 60 gallons of water per 1,000 sq ft with flat-fan nozzles producing medium to coarse droplets. Add a non-ionic surfactant at 0.25% v/v of final spray solution.

These treatments induce mild to moderate phytotoxicity in 'Tifway 419' hybrid bermudagrass. Full recovery typically occurs within 7 to 14 days after application, but the severity and recovery time vary based on turf conditions and environmental factors.

Certain common bermudagrass varieties (such as, but not limited to, Sahara, Vamont, Yukon, and Mohawk) and zoysiagrasses are very sensitive to the mixture of Tenacity + Princep. Before applying on a large scale, test the mixture in an inconspicuous location to determine the level of turf safety in your location. The safety of this mixture has not been tested on seashore paspalum or bermudagrass varieties other than those listed above.

Restrictions:

- Do not apply to golf course greens.
 - Follow the most restrictive **Use Precautions and Restrictions** on the Tenacity, Princep Liquid, and Pennant Magnum labels when tank-mixing these products.
