

SUPPLEMENTAL LABELING

Noble[®] Adjuvant

FOR DIRECTED SPRAY APPLICATION WITH POSTEMERGENT HERBICIDES ON TREES AND VINES

NOT FOR USE IN CALIFORNIA

Unless otherwise directed in this supplemental labeling, all applicable directions, restrictions, precautions and Conditions of Sale and Warranty on the label affixed to container are to be followed. This labeling must be in the user's possession during application.

FOR SPRAY APPLICATION USE WITH POSTEMERGENT HERBICIDES ON TREES AND VINES

- Use at a rate of 4 pints per acre

Special Caution: Noble[®] increases the effectiveness of herbicides. During periods of high temperatures or extremely humid conditions, herbicides become more active. It is recommended that a small test area be treated if such conditions prevail. Test areas are also recommended before treating new crop varieties or highly inbred crop lines.
