

CLASS ACT® RIDION®

WATER CONDITIONING AGENT Plus NONIONIC SURFACTANT BLEND

CONTAINS NO AMMONIUM SULFATE

With CornSorb®Technology

PRINCIPAL FUNCTIONING AGENTS:

1, 2, 3-Propanetricarboxylic acid, 2-hydroxy-, trisodium salt, dihydrate, High fructose corn syrup, Alkyl polyglycoside, Monocarbamide Dihydrogen Sulfate.....	34.75%
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANT	65.25%
TOTAL	100.00%

Surfactant content 10%

All ingredients are exempt from the requirements of a tolerance in 40 CFR 180.

Patent Pending

KEEP OUT OF REACH OF CHILDREN

WARNING

Harmful if inhaled. May cause respiratory irritation.

PRECAUTIONARY STATEMENTS

Avoid breathing mist or spray. Use only outdoors or in a well-ventilated area. Store in a well-ventilated place. Keep container tightly closed. Store locked up. Do not reuse container. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the web page at www.acrecycle.org. Triple rinse (or equivalent) during mixing and loading. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations. Dispose of contents in accordance with Federal, state and local regulations.

FIRST AID

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor for treatment advice if you feel unwell.

For Emergency, Spill, Leak, Fire Exposure or Accident, Call: CHEMTREC 1-800-424-9300

GENERAL INFORMATION

Class Act Ridion is a water conditioning agent plus nonionic surfactant blend for use with pesticides that are labeled for agricultural, forestry, non-cropland, and right-of-way uses. Class Act Ridion is formulated to meet the surfactant and water conditioning needs for many glyphosate, dicamba, 2,4-D, glufosinate, paraquat, and diquat herbicides or other. Class Act Ridion reduces potential antagonism by hard water and improves efficacy of most herbicides.

DIRECTIONS FOR USE

Shake well before using

Class Act Ridion may be used at a rate of 0.5-2.0% v/v (2 quarts to 2 gallons per 100 gallons of spray solution). This meets the water conditioning and surfactant needs of Cornerstone®, Cornerstone® Plus, Cornerstone 5® Plus, dicamba, 2,4-D, other glyphosate herbicides and many other herbicides. Follow herbicide label for specific rates, mixing instructions and other precautionary instructions. Class Act Ridion should be added to the spray tank first unless otherwise directed by product labels. Do not mix Class Act Ridion with InterLock® or MasterLock® in an induction system or container when both products are undiluted. **Once mixed in water, both products are compatible in either mixing order.** Generally, Class Act Ridion as a water conditioner should go in the tank first.

Use lower rates of Class Act Ridion with low water hardness and when weeds are small and actively growing. Use higher rates of Class Act Ridion when water is harder and weeds are difficult to control.
