CLASS ACT® RIDION®

NON-AMS WATER CONDITIONING AGENT AND NONIONIC SURFACTANT

With CornSorb®Technology

PRINCIPAL FUNCTIONING AGENTS:

1, 2, 3-Propanetricarboxyllic acid, 2-hydroxy-, trisodium salt, dihydrate, High fructose corn syrup, Alkyl polyglycoside,	
Monocarbamide Dihydrogen Sulfate	
CONSTITUENTS INEFFECTIVE AS SPRAY ADJUVANT	
TOTAL	100.00%
Surfactant content 10%	

All ingredients are exempt from the requirements of a tolerance in 40 CFR 180.

KEEP OUT OF REACH OF CHILDREN

Harmful if inhaled. May cause respiratory irritation.

SEE INSIDE BOOKLET FOR PRECAUTIONARY STATEMENTS, FIRST AID, AND STORAGE AND DISPOSAL

PRECAUTIONARY STATEMENTS

Avoid breathing mist or spray. Use only outdoors or in a well-ventilated area.

FIRST AID

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor for treatment advice if you feel unwell.

In case of medical emergency, call toll free 1-877-424-7452.

STORAGE AND DISPOSAL

Storage: Store in a well-ventilated place. Keep container tightly closed. Store locked up. Keep product in original container. Do not contaminate water, food or feed by storage or disposal.

Container Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.agrecycling.org. Decontaminated containers may also be disposed of in a sanitary landfill.

For Emergency: Spill, Leak, Fire Exposure or Accident, Call: CHEMTREC 1-800-424-9300

GENERAL INFORMATION

Class Act Ridion is a non-AMS water conditioning agent and nonionic surfactant blend for use with pesticides that are labeled for agricultural, forestry, non-cropland, and right-of-way uses. Class Act® Ridion® is a proprietary formulation that contains CornSorb® technology for quicker and more complete uptake and absorption of herbicides into weeds. Class Act® Ridion® meets the surfactant and water conditioning needs for glyphosate, dicamba, 2,4-D, and other herbicides. Class Act Ridion reduces potential antagonism by hard water and improves efficacy of most herbicides.

DIRECTIONS FOR USE Shake well before using

Class Act Ridion may be used at a rate of 0.5-2.0% v/v (2 quarts to 2 gallons per 100 gallons of spray solution). Follow herbicide label for specific rates, mixing instructions and other precautionary instructions. Class Act Ridion should be added to the spray tank first unless otherwise directed by product labels. Do not mix Class Act Ridion with other adjuvants in an induction system or container when both products are undiluted. **Once mixed in water, both products are compatible in either mixing order.** Generally, Class Act Ridion as a water conditioner should go in the tank first.

Use lower rates of Class Act Ridion with low water hardness and when weeds are small and actively growing. Use higher rates of Class Act Ridion when water is harder and weeds are difficult to control.
