this product, call toll free, day of night,
1-800-331-3148**

**EPA SLN NO.
NM-260001**

**FOR DISTRIBUTION AND USE
ONLY IN NEW MEXICO**

**It is a violation of federal law to use this
product in a manner inconsistent with its
labeling.**

**This label for RHYME[®] Fungicide is valid until December 31, 2031 or until otherwise amended,
withdrawn, canceled or suspended.**

Section 24(c) State Registration

DIRECTIONS FOR USE

For application through drip irrigation in grapes.

APPLICATION RATE

Apply RHYME Fungicide in a single application at 30.6 fl oz per acre or in a split of two applications of 15.2 fl oz per acre each.

APPLICATION TIMING

Make initial application between 30 to 60 days after bud break. If a split application is desired, make second application no closer than 45 days after first application but not within 14 days of harvest. When using a split application, the second timing may be applied as a postharvest to manage late season disease.

CROP	PESTS	RATE OF APPLICATION	
Grapes (soil applied)	Texas Root Rot Cotton Root Rot (Phymatotrichopsis omnivora)	Product Rate fl oz/A	lb ai/A
		15.2 – 30.6	0.25 – 0.5

USE DIRECTIONS THROUGH DRIP IRRIGATION

Irrigation system must be configured with one emitter within 8" of vine trunk.

Apply this product only through drip (trickle) chemigation systems.

The system must contain a functional check valve, vacuum relief valve and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreased to the point where pesticide distribution is adversely affected.

System must use a metering pump such as a positive displacement injection pump effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

RESTRICTIONS:

- No single application may exceed 30.6 fl oz/A
- Do not apply more than 2 applications per year
- Do not apply more than a total of 30.6 fl oz (0.5 lb ai/A)/year
- The REI is 12 hours.
- Preharvest Interval: Do not apply within 14 days of harvest.

MANUFACTURER'S CONDITIONS AND RISK OF USE FOR FEDERAL INSECTICIDE FUNGICIDE AND RODENTICIDE ACT (FIFRA) SECTION 24(c) REGISTRATION

NOTICE: This Section 24(c) label will only be utilized by growers located in the State of Texas. **SUCH GROWER USERS AGREE FMC CORPORATION WILL NOT BE HELD RESPONSIBLE FOR FAILURE TO PERFORM AND/OR CROP RESPONSE AND OR YIELD LOSSES RESULTING FROM THE USE OF RHYME FUNGICIDE AS A CHEMIGATION TREATMENT TO GRAPES.** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability on the commercial RHYME Fungicide Section 3 label and this 24(c) label before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS ON THE EPA REGISTERED LABEL ARE TO BE FOLLOWED. THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION.
