GENERAL INFORMATION

STRIKELock adjuvant is a high surfactant oil concentrate with a drift and deposition aid built-in that is designed to improve the performance of oil-loving herbicides.

Whether the pesticide label calls for a MSO, COC, or HSOC, STRIKELock's improved handling and flowability helps you get in the field faster.

Ideal for burndown and over-the-top applications, the integrated drift control additive ensures that more of your application lands on target.

Tested in the lab and in the field, STRIKELock increases the depth of deposition which enhances herbicide coverage and helps improve herbicide uptake and absorption.
