FOR CONTROL EUROPEAN CHERRY FRUIT FLY IN SWEET AND SOUR CHERRY IN THE STATE OF NEW YORK

Directions For Use

Application Rates, Timing, Method and Pest Controlled

EXIREL® insect control is recommended for control of European cherry fruit fly (*Rhagoletis cerasi*).

Apply EXIREL insect control at 13.5 – 20.5 fl. oz./A (0.088 – 0.133 lb ai/A) as a foliar spray.

Initiate foliar applications based on the presence of adult flies. Follow local university recommendations for treatment thresholds and optimum application timing.

Thorough spray coverage is essential for best performance. Select an appropriate spray volume based on the size of the trees and foliage density. Do not apply less than 30 gallons of water per acre by ground.

Use of adjuvants with EXIREL insect control has been shown to improve spray coverage and increase efficacy. Select adjuvants based on experience and known crop safety. If crop safety is unknown, use on a small area before treating larger areas. Refer to the *Tank Mixtures and Crop Safety* section of the EXIREL insect control label for additional information regarding tank mixtures.

Precautions when using EXIREL insect control in tank mixtures in stone fruit: Tank mixtures of EXIREL insect control with some non-ionic or oil-based adjuvants may cause adverse crop response. Tank mixtures of EXIREL insect control with organosilicone adjuvants at rates of 0.03% v/v or lower have been tested and shown not to result in crop response on cherry leaves or fruit. DO NOT tank mix EXIREL insect control with any other type of adjuvant unless crop safety has been tested. See "Tank Mixtures and Crop Safety" section of the EXIREL insect control label for more information.

SPRAY PREPARATION

Acidification of spray tank: If the pH of the spray tank after all products have been added and mixed is above pH 8, adjust to pH 8 or less using a registered acidifying agent. If the spray tank pH is 8 or less, no adjustment is necessary. Spray tanks of pH 8 or less can be held up to 8 hours before spraying. Do not store the spray mixture overnight in the spray tank.
