Directions For Use

AVAUNT insecticide is recommended as a foliar application to control adult Plum Curculio in Blueberry. Apply AVAUNT insecticide at 6.0 oz/A (0.11 lb ai/A) as a foliar spray based on locally established treatment thresholds. Allow 5 to 7 days to achieve maximum results. Make repeat applications on a 7 to 10 day schedule if monitoring indicates continued adult feeding activity. If AVAUNT insecticide is applied in two consecutive applications; it is recommended to switch to a different mode of action insecticide before making another application of AVAUNT insecticide to reduce the risk of insect resistance.
